No Move Injections or Surgery...

Dr. Steve Klayman Releases a Bombshell Anti-Wrinkle Product That Rocks the Beauty Industry

Rebel Doctor's 'Botox in a Bottle' Now Available in the USA ... Thousands Cancel Surgery and Painful Injection Appointments

NEW YORK — From New York to Beverly Hills, cosmetic surgeons are hopping mad. These well heeled doctors earning $500,000 or more are used to having things their way. Today they feel betrayed.

That's because Dr. Steve Klayman, one of America's most trusted doctors, just released a bombshell: "As far as I know, I'm the first to blatantly break their sacred 'code of honor!' I'm coming clean – and spilling the beans on one of the medical profession's most closely guarded secrets."

"The 'rich doctor's fraternity' will be after my scalp. But I don't care. I want you to know the STRAIGHT TRUTH about how to turn back the clock – quickly, easily, in the comfort of your own home."

Watch Your Wrinkles Disappear — MAGICALLY

Until now, plastic surgeons had a stranglehold on the anti-aging market. Expensive facelift procedures and dubious Botox injections seemed to be the preserve of Hollywood celebrities and A-listers. But a surprise FDA approval – and a stunning confession from Dr. Klayman – opens the door for millions of Main Street Americans to benefit from a 100% natural "Botox in a Bottle" beauty secret.

At last, we have convincing proof that a single pill can trigger the most extraordinary turnaround of your lifetime:

- Unsightly wrinkles... ***BANISHED!***
- Dark *Age Spots*... ***GONE!***
- Sagging cheeks and chin... ***REGIVEN-STEP***
- Old, loose skin... ***TRANSFORMED!*** into healthy, elastic and radiant skin

It's like wiping 10 years from your face – in an instant. The name of this remarkable age-defying formulation is **PhytAge+** (pronounced *Fight Age Plus*). It works by "refreshing" and moisturizing every cell in your body from the inside out – filling in cracks and smoothing the rough surfaces of your face. Results so far have been dramatic. You won't recognize yourself when you look in the mirror 30 days from now!

FDA Approves the Phytoceramide Breakthrough

According to the Cleveland Clinic, 75% of your skin is made up of the protein collagen. It's absolutely essential for warding off wrinkles and fine lines. New clinical studies prove that a plant-based, all natural substance is effective at shielding your collagen level – helping you keep a healthy "glow" reminiscent of when you were in your 20's.

Used in Japan for centuries, Phytoceramides (the chief ingredient in **PhytAge+**) have long been a key ingredient in expensive skin creams. The problem is that topical applications may not penetrate deeply enough into the skin to effectively block wrinkle formation and skin aging.

Dr. Steve Klayman

Dr. Steven Klayman is a world renown expert on skin care and dermatology. His secret 'Botox in a Bottle' formula is proven to make unsightly wrinkles *disappear* in as little as 15 days. As he says, "I am not well liked by the plastic surgery community, but I'm tired of them having a stranglehold on the anti-aging market."

In breaking news, the FDA just approved an oral form of this powerful and 100% natural skin moisturizer. This ensures its potent molecules are absorbed into the bloodstream. At Osaka City University, a study was completed of 33 patients, including six men and twenty-seven women. It lasted over a six-week period, during which time they all took phytoceramides in capsule form on a daily basis. The result? Phytoceramides were found to work instantly, repairing wrinkles and aging skin on the entire body. Subjects went from tired and old looking, to fresh and shiny. Imagine peeling back the layers of an onion – to reveal a smiler, glowing skin you haven't seen for 30...20... even 10 years.

"Dear Friends will Envy Is Disbelief – How did you smooth out a decade of unsightly wrinkles in just 15 days?"

Unfortunately, you surely will lose *Phytoceramides* as you age, so your skin begins to look rough and wrinkled. But by taking **PhytAge+**, you get a rare batch of powerful age-fighting molecules to make your skin look and feel plump. Not just ON the skin – they go deep INSIDE and improve the structure of your skin. They nourish your skin from the bottom layer upward. By the time they reach the surface of your face, your wrinkles and sun-damaged skin simply disappear.

BEWARE: The Wall Street Journal confirms that 25 years after Botox hit the market, the industry of injecting deadly toxins into the body now generates an amazing $2 billion dollars per year. **Finally, here's a *less invasive*... *less shivering*... *and far SAFER* anti-aging solution.**

All you need is one **PhytAge+** veggie capsule per day to create a protective barrier for your skin tissue – triggering the full, soft, youthful glow you've been nothing. Not just for your face. For your whole body. WITHOUT artificial, chemical additives and WITHOUT going under the knife.

Dr. Oz Show: "Taking a facelift may be as easy as taking one little pill!"

Were you lucky enough to see Dr. Oz's TV episode called, 'Drop a Decade from your Face'? He consulted America's top plastic surgeons to find alternatives to popular (but costly) cosmetic procedures. Then he presented his Top 5 beauty secrets for achieving safer, cheaper and easier alternatives to a facelift or chemical peel. Phytoceramides were near the top of his list. No wonder many experts are saying facelifts and Botox injections may soon be obsolete.

Customer feedback, like these testimonials below, has been unanimously positive. You too will be amazed how fast your wrinkles disappear – so what are you waiting for?

Sara P. from Des Moines, Iowa says, *"I've not looked this young in 25 years! This is truly a miracle in a bottle!*
