After years of painstaking research, scientists have announced a weight loss discovery so radical it could end America's obesity epidemic by 2018.

"This is a real game-changer!" Says John P, a nutritionist from Phoenix, AZ. Some say, Garcinia Cambogia is going to put millions out of work. Referring to the countless jobs in the diet industry. But just think about the millions of lives that will be saved from sickness and disease that comes from being fat!

Famous TV Heart Surgeon: This is the "Holy Grail for people with Weight problems!"

As new pill gains popularity, scenes like this will become rare and unusual.

So exactly why is Garcinia Cambogia wowing the scientific community?

For one thing, it's not another diet craze that's in one day and out the other.

It's a remarkable substance derived from of all things... a pumpkin-seed! But not just any pumpkin seed will do. It has to be grown only in specific regions and cultivated under just the right conditions. The very best of the crop is "Garcinia Cambogia 2000".

Garcinia Cambogia wipes away fat so completely, that it has caught the attention of scientists and weight loss experts all over the globe. It works like nothing else seen before. Simply take as directed and eat reasonably. You can almost see your excess fat melt off your body. It's just that effective!

Experts predict, the data is so compelling...

"Weight-loss centers could be forced to shut down. Diet doctors could be out of business within 5-years."

"There just won't be a need for them anymore," he added.

Gastric Bypass in a Bottle

The real power of Garcinia Cambogia lies deep inside the fruit. It contains an ingredient called HCA (Hydroxycitric Acid) that melts fat away in the same way stomach stapling does.

Johan Stifling, a leading scientist in Utrecht Holland says: "With Garcinia it doesn't take much to fill you up. You're just not hungry anymore. The compound absolutely kills uncontrollable urges to binge on food in just minutes after taking it. After just a few bites, you'll feel stuffed to the gills. You'll swear your stomach has shrunk."

The secret is its ability to inhibit Citrate Lyase Enzyme (the stuff that turns carbs into fat). HCA builds an "impenetrable wall" so fat can't get absorbed by your body... so you simply can't gain weight. Then, the HCA breaks up the fat you already have and forces it out of your body.

Think about it. A pill that stops fat from being made, as it obliterates the fat you already have. Incredibly, the pounds and inches just roll off you.

Not Just for the Wealthy

Until recently, only the rich, famous and powerful have been able to try Garcinia Cambogia. But now, for the first time ever, the manufacturer has made this revolutionary perfected Garcinia Cambogia and made it available to the general public. They Call it Garcinia Cambogia 2000. And since the country's obesity rate is at an all-time-high; it couldn't have come at a better time.
