

Common Acid Reflux Drugs Linked to Heart Disease, Say Medical Researchers

With millions at risk, more doctors now embracing natural aloe discovery that stops heartburn almost instantly, balances stomach acid, soothes digestion; deemed 'one of the most important health discoveries of all time'

BOSTON, MASS. — Can it get any worse for the millions of Americans who gulp pills and antacids during the day and sleep propped up on pillows at night?

If constant heartburn, gas and constipation were not enough, now comes word that a popular class of acid reflux drugs used by tens of millions of Americans may damage the heart and even cause heart disease.

Reflux Drugs Risky?

In a study published in the American Heart Association's journal, *Circulation*, Methodist Hospital researchers found that proton pump inhibitors, or PPIs like Prevacid®, Nexium®, and Prilosec®, may reduce the ability of blood vessels to relax by more than 30 percent.

"Blood vessels need to be able to contract and open up to control blood flow," says study author, John P. Cooke, clinical professor and chair of the department of cardiovascular sciences at Houston Methodist Hospital.

Earlier studies have linked PPIs to increased risk of bone fractures, increased risk of infection from *Clostridium difficile* (a deadly bacterium for the elderly), and an increased risk of developing pneumonia.

of doctors are bypassing the side effects of antacids and PPIs, and choosing to go 'all-natural.'

Hello Aloe

To acid reflux patients, Dr. Leal recommends a fast-acting, drug-free, pure aloe extract called AloeCure.

AloeCure does what no other heartburn remedy can do.

Antacids and prescription reflux drugs suppress and neutralize stomach acid, weakening digestive function, and causing unexpected and painful acid rebounding.

A New Way to Stop Heartburn

AloeCure stops heartburn before it starts by *regulating* stomach acid thanks to a unique acid-buffering compound of natural calcium-malate.

Oscar V. can once again enjoy his bowl of spicy chili.

This fast-acting buffering helps stabilize pH levels, so heartburn quickly goes away. AloeCure is a high-tech extract derived from a medicinal plant with a 3,800-year-old track record.

"If aloe vera were discovered today," says Dr. Bryce Wyld, best-selling health and wellness author, and homeopathic physician, "it would be considered one of the most important health discoveries of all time."

Works Fast

Dr. Santiago Rodriguez, a leading expert on aloe and founder of Lorand Labs, says, "In minutes, aloe vera juice like that found in AloeCure can promote a ten-fold reduction in stomach acid."

In addition to extinguishing acid reflux, AloeCure helps the entire digestive system, dispatching polysaccharide-rich molecular repair teams that spread through the digestive system to soothe and heal damaged tissues.

Head to Toe Benefits

In her practice, Dr. Leal recommends AloeCure, an alternative recommendation to

patients with acid reflux, IBS, gastritis, heartburn, and to patients who are taking H2 blockers, PPIs, as well as those who suffer with chronic pain.

A ground-breaking study at the University of Miami has even linked aloe vera use with improved cognitive performance in patients diagnosed with moderate-to-severe mental decline.

So surprising were the results that lead researcher John E. Lewis, associate professor at the University of Miami Miller School of Medicine, said, "It was actually like bringing the people back to life!"

While aloe is good for mind, it is even better for body, according to Dr. Leal.

"A number of studies," says Dr. Leal, "are looking at aloe's ability to reduce inflammation, making it a promising, and very cost-effective treatment option."

This explains some of the added health benefits, says Dr. Leal, including healthier joints and muscles.

"I tell my patients that AloeCure will make their tummy feel better and their joints feel better, too!"

Makes Pain Go Away

"For my patients who live with chronic digestive pain," says Dr. Leal, "AloeCure can be life-changing."

Certified by the American Academy of Pain Management, Dr. Leal has firsthand knowledge of pain.

In her third year of medical school, she was stunned with a diagnosis of rheumatoid arthritis.

Very quickly she lost the ability to walk, and became wheelchair-bound.

One doctor told her to get her affairs in order as she faced a lifetime of crippling pain.

Her commitment to live a healthier, more active life, along with the invaluable support of friends, and her discovery of natural healing breakthroughs like AloeCure have changed her life and health.

"The first step in getting my patients to live well without using a pharmaceutical," says Dr. Leal,

Modern acid reflux drugs called PPIs, or proton pump inhibitors, have been linked to increased risk of bone fractures, deadly infections, and now, heart disease. Many healthcare professionals have turned to a fast-acting aloe vera extract that gently buffers stomach acid, restoring healthy pH levels.

"is with AloeCure. I use it in my medical practice because it works."

Health enthusiast Philip agrees, "All the problems I had with my stomach are gone, completely gone."

Freedom from Antacids

AloeCure has freed Robert B. from a years-long dependence on antacids. "Frankly, I was surprised at how helpful it was," admits Robert.

No more sleeping propped up on pillows at night, Gloria H. is over her heartburn problems.

"After I started taking AloeCure," she says, "in just two, three days, I noticed right away that I was not having to take over-the-counter tablets."

Free to Eat What You Want

AloeCure's ability to assist the body in correcting the underlying

causes of heartburn lets acid sufferers once again enjoy the foods they love.

Oscar V. has had a lifelong love affair with spicy foods.

"I love my spicy food," smiles Oscar. His favorites? "Chili and other stuff like that."

In the past, Oscar "would have to back off a little bit," before diving into a bowl of chili.

Now, AloeCure's soothing, cooling relief has made him a happy man. "I am eating what I want to eat now," says Oscar.

Janet P. thinks AloeCure has made a "huge difference" in her life.

"When I would eat, the food would just sit there. Soon, I would get that familiar burning in my chest. AloeCure works for me!"

Gil H. can attest to AloeCure's speedy relief.

"I found AloeCure. It is soothing going down and works almost immediately!"

Gloria H. says, "I don't have to worry about going out late and eating because I know that I can come home and still get a good night's rest. I no longer have to prop myself up on pillows to sleep!"

If you are ready to end your heartburn and digestive problems once and for all, here is your opportunity to try AloeCure, risk-free.

Get a Free 30-Day Supply of Doctor Recommended AloeCure

Call the toll-free number below and ask how you can get a *free* 30-day supply of AloeCure with your order.

It's the same, heartburn-relieving formula used and recommended by Dr. Leal.

It is the #1-selling aloe-based digestive formula in the US, and it is also mentioned in the medically acclaimed book, *Aloe Vera: A Key to Good Health!*
