

Men Rush To Get New Fast Acting Sex Pill

Clinical results show active ingredient triggers surge in sexual desire and performance without side effects; public now facing 48-hour cut off

NMS—Imagine a pill that increases your natural drive and desire for sex in just days.

Then think how great it would feel to get “ready” faster and stay “strong” for longer—without side effects!

Well, there’s no need to imagine. A team of scientists has delivered an amazing new sex pill for aging men. Clinical results show the active ingredient restores male libido levels in just weeks.

Now after years of research and testing, doctors from coast-to-coast are recommending it to patients.

The developers of this amazing discovery have named it Viotrin. And there are some very good reasons why sales are booming.

To begin with, the clinical results were very impressive.

Men taking Viotrin’s active ingredient enjoyed increased sexual desire. They enjoyed better erections, too. Even the length of time they could last during sex more than doubled.

Viotrin comes from a natural plant source. It’s safe. It’s healthy. There are no adverse side effects. And since researchers believe it works to restore testosterone levels in the body, results can be seen quite quickly.

“Our goal was to formulate Viotrin so that men would feel results within 30 days,” said Richard Cannon, Director of the *American Institute of Health and Wellness*, the creators of Viotrin.

“And based on the feedback from men I think we hit the bulls-eye with this new pill,” added Cannon.

Why so much excitement?

Viotrin contains an amazing compound with a known ability to improve a man’s sex drive.

Growing old is hard. Any aging man would surely agree; he would love to feel strong sexual urges for his wife or girlfriend once again.

Well, that’s where Viotrin comes in, since that is exactly what users of this remarkable pill are reporting.

“After years of failing interest, now I can look at my wife with desire again,” said Clay Woodward. “Viotrin doesn’t just increase my libido, it makes me more passionate, too.”

With feedback like this, it’s easy to understand why so many men are using this pill and why so many doctors are now

recommending it.

Impressive clinical results

The 12 week clinical study was carried out by scientists in California and Kuala Lumpur, Malaysia. The results were published in the medical journal *Evidence-Based Complimentary and Alternative Medicine* in January 2014.

The study involved men aged 40 to 65. They were not instructed to change their diet, exercise, or daily routines. They were told only to take Viotrin’s active ingredient every day.

The results were stunning.

Men who took the active ingredient as instructed enjoyed a surge in sexual libido. They also reported stronger, longer-lasting erections. In contrast, none of the men taking the placebo reported these benefits.

Some men experienced incredible results, increasing the length of time they could last during sex from 7.47 minutes to 19.56 minutes on average.

“We knew we had a great product, but it’s even exceeded our expectations,” said Tanya Miller, Manager of Call Center Operations. “We’re getting thousands of calls per week. Men just keep placing orders. It’s been amazing,” she added.

How it works

The active ingredient in Viotrin comes from a plant that grows in Indonesia. This “miracle” plant is called *Eurycoma Longifolia*. The native tribes who have used it for centuries claim it restores sexual health and vitality!

Until recently, the only way to get the plant’s benefits was to eat the plant’s root. But scientists have developed a process that enables the makers of Viotrin to put the plant’s benefits into a pill.

Scientists believe Viotrin’s active ingredient works to restore lost testosterone levels in the body.

“You may have low testosterone if you are over age 45, and your desire for sex and your ability to get and stay hard is disappearing,” said Delmer Hock, Chief

Researcher for Viotrin.

“Viotrin’s active ingredient helps the male body produce more testosterone. Increasing testosterone triggers a rise in libido and sexual performance. Blood tests and clinical studies have shown this to be true” he added.

What doctors are saying

“Many Viotrin users note an increased sense of well-being, vitality, and sexual performance in the first 30 days,” said Dr. Holly Lucille, who has appeared on award winning T.V. shows like *The Doctors*, and PBS’ *Healing Quest*.

“I recommend Viotrin to men who find it difficult to become aroused. It does wonders for your sexual appetite. Your sexual sensitivity. Even for your staying power and stamina,” said Dr. Vincent Leaper, a medical doctor from London, England.

“Viotrin is a good choice for men who feel they have passed their peak. The results of using this pill can be an increase in energy levels, vigor, and a decrease in depressive mood,” said Dr. Decker Weiss, Integrative Cardiologist and Professional Committee Member of the *American Heart Association*.

How to get Viotrin

This is the official release of Viotrin in Florida. And so, the company is offering a special discount supply to any man who calls within the next 48-hours.

A Regional Order Hotline has been set up for local readers to call. This gives everyone an equal chance to try Viotrin.

Starting at 7:00 am today, the order hotline will be open for 48-hours. All you have to do is call TOLL-FREE **1-800-000-0000** and provide the operator with the special discount approval code: BRF179. The company will do the rest.

Current supplies of Viotrin are limited. So consumers that don’t get through to the order hotline within the next 48-hours will have to wait until more inventory is produced. This could take as long as six weeks.
