Dear Lover of Good Heart Health,

I lost my mother to a heart attack at age 51. I know firsthand that heart disease is much more than an illness. It's about love and loss — lives and dreams destroyed. There were no warning signs of heart disease, yet Mom's autopsy showed extensive blockage of the arteries. That's when I dedicated

The Most Dangerous Heart Risks Cannot Always be Easily Detected!

High cholesterol. High blood pressure. Obesity. Everyone knows these are some serious problems that may lead to heart disease, heart attack and stroke, among others.

However, there are many other hidden risk factors associated with this family of heart-related diseases that don't produce any outward signs on your body and are virtually undetectable. That's right! These don't show up on any blood test. You cannot detect it with a stethoscope or an EKG.

attack offers no advantage over standard drug therapy. Angioplasty is the usual treatment for the nearly 1 million heart attacks that occur in the U.S. each year. One-third of the victims do not seek medical treatment within the first 12 hours, when angioplasty is the most effective, according to the U.S. Department of Health and Human Services, National Institutes of Health¹. Drug treatment works the same as angioplasty. Clot-busting drugs may not be given because patients arrive at the hospital too late. And that's why it is important that you take care of yourself before this can happen to you.

CardioVital Plus has helped thousands of people just like you overcome many heart-health problems with our powerful, natural formula. It is very effective and is in a liquid form which is fast absorbed by the body and goes to areas where it is most needed.

CardioVital Plus is the "Anti-Plaque" Antidote to Begin Blasting Away Cholesterol With the First Drop...

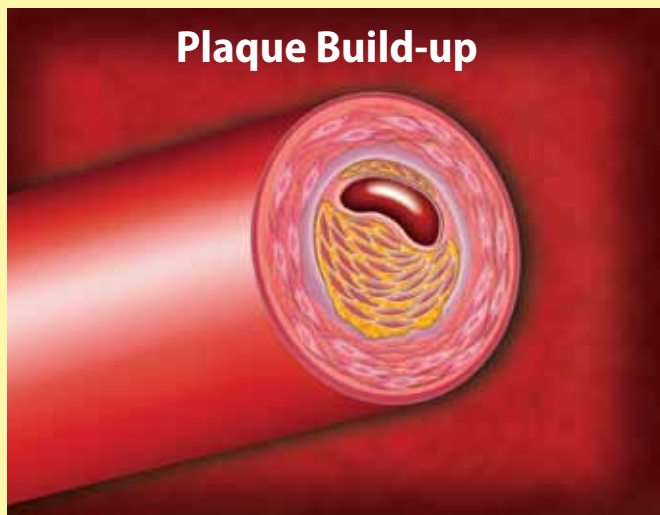

CardioVital Plus is the "Anti-Plaque" solution for blood vessels that feed blood directly to your heart. If there is too much build-up of fat in your arteries, you become a major candidate for arteriosclerosis, the medical term for the build-up of plaque or fat in the walls of your arteries. We know that these, the most potent, pro-heart essential phytonutrients on earth, carefully selected for our formula, can help you even if you've been told your condition is hopeless.

Usually, arteriosclerosis, also called hardening of the arteries, starts with small deposits inside of the blood vessels. This is responsible for developing "nano" (small) plaques, which is the medical term for the minor clogging of the blood

Arteries were all cleared up! WOW!

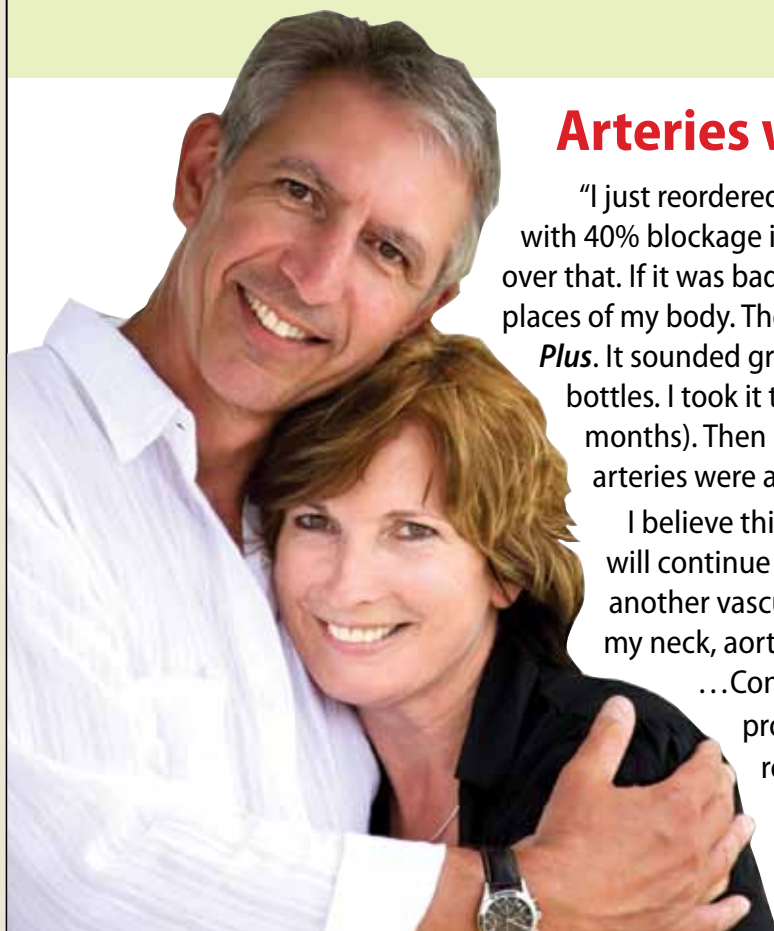

"I just reordered two bottles of **Cardio Vital Plus**. I was diagnosed with 40% blockage in my neck artery and became alarmed over that. If it was bad there, it could also be bad in other places of my body. Then I received a booklet on **Cardio Vital Plus**. It sounded great to me, so I ordered two bottles. I took it the rest of the year (about 6 months). Then I had another artery test and the arteries were all cleared up! **WOW!!**

I believe this is my 3rd order and certainly will continue to order it in the future. I had another vascular screening and once again my neck, aorta and leg arteries were clear.

...Congratulations on an excellent product. I will continue to use it the rest of my life. Anyone with artery problems should know how wonderful it is."*
