

"It was early morning when I sat down to read the morning paper and all of a sudden everything was getting dim and turning an ugly grey.

I realized I was **losing my eyesight.**

I closed my eyes and just sat there wondering what I was going to do.

When I opened my eyes, my vision had returned, so I knew it was a temporary thing.

I called my optician and he checked my eyes. He couldn't find anything wrong and said it was probably **a circulation problem.**

He sent me to a specialist and he agreed with my optician. This blindness happened to me twice and I will say it is very scary.

Reading through a brochure I had received in the mail, I came across the ad for your product.

I have been using it for four months and, so far, **have not had any vision loss.**

I also have **more pep** and stamina.

It was also time for a regular medical check-up including blood work. A couple of days later, the nurse called and told me **my numbers were great!** That included blood pressure, **LDL, and HDL cholesterol.**

She told me she didn't know what I was doing but to keep it up, and **I am giving all the credit to your amazing formula."**

PROOF POSITIVE Nattokinase—as found in The Circulation Solution™—can boost healthy blood flow starting in just seven days!

EXHIBIT #1:

Patient suffers from "sticky" blood. Blood cells are so clumped together, it's difficult to see their individual shape and size. This is a red flag for a health crisis!

After Nattokinase:

Individual cells are noticeable. Smooth round shape indicates free flowing blood. This patient experienced remarkable benefits!

EXHIBIT #2:

42-year old female, non smoker. Supplement duration: 7 days

Before Nattokinase:

Blood cells stuck together like this means the patient isn't getting sufficient nutrients and her blood flow is impaired. This can lead to fatigue, low energy, and cold hands and feet.

After Nattokinase:

These healthy, round blood cells are an indicator that the patient's health has significantly improved. Free flowing blood cells means more energy and vitality!

Have you heard about natto? Well, you will now!

If you've been diagnosed with a blood clot—then you know what happens:

Your doctor puts you on a prescription blood thinning drug such as Coumadin®... Urokinase®... or even Plavix®—all loaded with nasty side effects that include internal bleeding... intestinal problems... and even HEART FAILURE!

And if you're diagnosed with thick blood or poor circulation...

...Your doctor puts you on an “aspirin a day” FOR LIFE—even though scores of scientific research shows that aspirin can wear away your stomach lining and cause digestive problems... bruising... internal bleeding... and even death!

But did you know you have a SAFE alternative?

Yes, you do—thanks to a little-known Japanese “stinky cheese” remedy! Let me explain...

For over 1,000 years, the Japanese diet included a fermented cheese-like food made from boiled soybeans and active bacteria. They called it “natto.”

Natto was such a potent, energy-boosting food—Japanese Samurai warriors made it a regular part of their diet for strength and endurance. What the warriors didn't know is that natto is loaded with protein...

carbohydrates... fiber... calcium... iron... and vitamin E! What's more...

...It wasn't until modern times that the Japanese discovered their “stinky cheese” also contained a powerful enzyme that has the uncanny ability to patrol and monitor blood clots throughout your body—more about that later...

Now you know how important it is for your blood to clot properly, right? Without your body's ability to clot blood—well, you'd bleed to death from a simple cut!

So your ability to stop bleeding is crucial for life. That's why your body forms fibrin—a mesh-like composition of materials that ultimately becomes a clot.

Once the fibrin does its job to stop the bleeding—your body releases an enzyme called plasmin to safely dissolve the clot. But here's the problem...

As you turn 40... 50... 60... and older—your body produces less and less of the naturally occurring plasmin.

Without the plasmin—blood clots linger in your blood stream and float around until they eventually get stuck in a capillary... vein... or artery and clog up your blood flow.

And you know what can happen if that clot blocks the blood flow to your brain... heart... or lung? That's right—a serious health disaster!

That's why what I'm going to SHOW YOU next is such an amazing discovery...

Over 27 years ago, a Japanese medical researcher named Hiyosuki Sumi, M.D. of the renowned Japanese Ministry of Education was hired to find natural agents that could dissolve blood clots.

He meticulously tested 173

I read your report on The Circulation Solution™ and ordered a bottle. I began giving my wife the recommended dose. In three days the swelling was going away and completely disappeared in six days. No side effects, either. I keep a bottle on hand now."

different substances by putting each one of them in a Petri dish with artificial blood clots.

He patiently waited to see which of these substances would dissolve the blood clots and how long it would take. This was a time-consuming and painstaking process producing very little positive results.

And evidently one day Dr. Sumi got a little bored—and thank goodness for that!

It was getting close to lunch time and that day Dr. Sumi brought his favorite food—yep, you guessed it, the “stinky cheese” natto!

Out of curiosity, Dr. Sumi wondered what would happen if he put a piece of his natto in the Petri dish with a blood clot. And you know what happened?

Like Pac Man—the natto began to devour the clot! And within 18 hours—the clot was completely dissolved!

EUREKA!

None of the 173 substances Dr. Sumi tested worked as well as his natto! Since the enzyme was discovered in the natto cheese—it just made sense for Dr. Sumi to call his amazing discovery “Nattokinase”—pronounced “NAT-TOE-KEN-ACE.”

And this accidental discovery led to even more scientific research that proved nattokinase not only naturally dissolves blood clots...

...But can help keep future

clots from occurring in the first place—and that’s phenomenal news for you—if you have a history of blood clot concerns!

What’s more, you can safely take this amazing enzyme to attack EXISTING blood clots in your body! Yes, scientific testing proves nattokinase can DISSOLVE clots fast and easy so you can help unclog your precious arteries!

The Japanese have been saving lives with nattokinase for over two decades—now you can get your hands on this remarkable and natural blood thinner too!

It’s a downright shame that most Americans don’t know about the life-saving benefits of nattokinase!

Over 17 studies including human trials prove nattokinase can help relieve a host of circulation problems...

...And the Japanese have been using this amazing nutrient to save lives for over 26 years!

Isn’t it time we Americans got in on this health blessing, too?

That’s why I’ve made it my mission to bring this amazing remedy to YOU dear friend! And now you can get the most powerful form of nattokinase known to mankind—in **The Circulation Solution™**—available through Health Resources™!

Here’s more of the scientific research that shows the remarkable power of nattokinase. That’s why I can say, beyond a shadow of a doubt: The Circulation Solution™ is for you if you...

Nattokinase delivers long lasting protection!

Here's the proof!

Did you know nattokinase protects you from blood clots longer than other clot-dissolving options? It's true. Here's what researchers at the JCR Pharmaceuticals, Oklahoma State University, and Miyazaki Medical College discovered:

The study was conducted on 12 healthy volunteers between the ages of 21 and 55. Each volunteer was given 200 grams of natto cheese before breakfast. (One capsule of The Circulation Solution™ contains approximately the same nattokinase potency as 200 grams of natto cheese.)

The researchers then tracked their clot-dissolving ability through a series of plasma tests.

The tests showed that the volunteers had the ability to dissolve clots more quickly after taking nattokinase.

In fact, the volunteers' ELT (the length of time it takes to dissolve a blood clot) shortened by 48% within two hours of taking the natto. That's fantastic news!

What's more...

...Research shows I.V. drug treatments start to lose potency immediately once the I.V. is removed from your arm. That can be less than 30 minutes! But...

...A dose of nattokinase—found in The Circulation Solution™—can stay active in your body for up to eight hours!

For long lasting support for healthy circulation—the answer is simple! Get The Circulation Solution™!

and I'm much less fearful. I am 75 years old. In the recent past, I've had some eye migraines with some loss of side vision. My doctor suggested taking aspirin daily. I hesitated as I have some G.I. problems. I listened to another health professional who said don't take aspirin. Then I read about nattokinase in your brochure and decided to give The Circulation Solution™ a try. My doctor ok'd it. I am happy to report the eye migraines have stopped. Thus my mind is relieved because I have a safe way to help avoid blockages. I thank you for a good product."
