Goodbye!”

Skeptical? I sure hope so — but you won't be for long!

Look inside and discover the indisputable proof... scientific research... and REAL-LIFE case studies of folks who RESTORED healthy pH balance... SAID GOODBYE to their health problems... and now FEEL better than ever!

Guaranteed to work for you — or it's FREE!

Have you seen a swimming pool when it's not in pH balance?

Dear friend,

The water looks cloudy and murky... brown and black stains appear on the walls... and green algae turns the pool into a swamp land.

And what about that foul, nasty smell that attracts all sorts of bugs and unwanted wildlife? YUCK!

Now think about this: Your body is just like that swimming pool. When your pH level is out of balance — you build up acid waste in your cells that can break down healthy muscle tissue... cause cells to weaken... put the welcome mat out for all sorts of health problems... and trigger:

✓ **Joint pain and muscle aches**

- ✓ **Poor circulation and sluggish blood**
- ✓ **Irregular heart beats**
- ✓ **Premature aging**
- ✓ **Weak veins and arteries**
- ✓ **Shortness of breath and poor lung function**
- ✓ **Low energy**
- ✓ **Weight gain**
- ✓ **Bad breath**
- ✓ **And a whole lot more!**

So how do you restore your body back to perfect pH balance — even if you're 50... 60... 70... or older?

By lowering your acid levels — and **BOOSTING** your alkaline power!

My name is Dr. Michael Cutler.

And for over 19 years, I've helped my patients restore their body to a healthy pH balance. And quite frankly, when that happens, you experience real life health **MIRACLES** like these folks...

"More Stamina & Energy!"

"I have more stamina and energy and I can walk greater distances without tiring and getting out of breath. I also sleep better and wake up feeling refreshed in the mornings. The only thing I can attribute this to is your remarkable remedy because it is the only supplement I've added to my diet in years. I am 70

Meet Michael Cutler, M.D.

Through sickness he grew up to lead Americans to better health through optimum body chemistry!

The truth is, during my first bout of ulcerative colitis, I found myself more interested in playing with my chemistry set than out playing sports like my friends.

I’ve always been fascinated to see how things work on a cellular level. Years later, when I became a doctor, I became convinced that healthy body chemistry — and not prescription drugs — was the key to optimum health.

As I fought my own battles with digestive problems, I saw first hand how rebalancing my body chemistry provided the real relief I was looking for.

And every day in my medical practice, I see patients PREVENT and even REVERSE serious health problem when they restore their body chemistry back to optimum pH levels.

This special report is my “gift of health” to you. The information you’re about to uncover may literally help save your life.

"This is the best heartburn relief I ever had!"

"I take your formula as recommended. But if I overeat and reflux begins, I immediately take another dose and the symptoms end at once."

—Nancy P., Pullman, WA

"Natural solution for our problems!"

"I really like your wonderful

body balancing formula. It really works. Also my husband and my brother-in-law swear by it. I have never bought medicines that do the job as well as this natural remedy. I'm so glad we found out about it. We have cut down on many of our prescription drugs. Thanks ever so much."

—Jetta C., Palenville, NY

"More energy!"

"Since taking this Godsend,

I have more energy to take on difficult work. My results are exceptional. I started out at 4.45 acidic levels and just this week, I am now at 7.5 alkaline. Thank you for your product."

—Freida M., Milwaukee, WI

"Now, it's easy to get the acid out!"

"I put the drops into almost every liquid I consume: Soup, tea,

Here's what really happens when your body is too acidic...

According to Dr. Theodore Baroody, Ph.D., author of *Alkalize or Die...*

"Acid wastes literally attack the joints, tissues, muscles, organs, and glands causing minor to major dysfunction." In other words, you can develop:

■ **Digestion problems.** When the small intestine is too acidic — it can't properly digest foods. So your brain issues a command for your pancreas, gallbladder, and liver to perform "double duty" to help out your intestine. This creates a metabolic overload on those organs that can result in lowered immune function, fatigue, hormonal imbalances, and absorption problems!

■ **Weak bones.** To help your body regain pH balance, your bones will sacrifice one of its most alkaline minerals — calcium! Less calcium in your bones means reduced ability to absorb other essential minerals. This causes bone density problems that create fragile and porous bones!

■ **Weight gain.** Too much acid creates an overproduction of insulin. This causes fat to be stored instead of burned off by your body. As a result, weight gain is common and weight loss becomes even more difficult!

Acid waste narrows blood vessels — making it difficult for healthy blood flow!

■ **Fatigue and sluggishness.**

Electrolytes help your nerve, heart, and muscle cells generate energy throughout your body! Too much acid causes an electrolyte imbalance that leaves you tired, weak, and too pooped to perform everyday tasks!

■ **Kidney stones.** In order to remain healthy, cells must regularly expel all the waste products they create. But if your blood becomes too acidic, the waste will cling to the walls of cells. This causes acidic

fluoride that crystallizes and creates kidney stones.

■ **Stress.** Physical and mental stress cause your body to produce more acidic waste — leading to acidosis. Long-term stress forces organs like your kidneys, gallbladder, and pancreas to perform "double duty." Overworked organs create harmful problems such as headaches, mental sluggishness, mood swings, and unbalanced hormones!

Can you see why it's critical to keep your body in pH balance?

Fortunately you can — and it just takes four drops in each glass of your daily drinking water! That's it!

as well as water. It's a quick and easy way to solve the problem of acidity. Now my leg muscles are working again. Adjusting my diet has been important too. If I get careless, my legs return to their former discomfort."

—Mary N., Salem, NH

"Even my doctor was amazed!"

"I had a burning sensation for several months with daily eliminations. Suspecting that my system might be highly acidic, I decided to try your formula. I still can't believe the results. Within five days, all burning stopped and has not returned since I started using your product. I told my doctor about this, and he asked me to bring in my bottle to examine it. He said he saw nothing in the ingredients that would be harmful, but he agrees something happened to totally fix my problem."

—Thomas R., Hampshire, IL

How do you get your body in alkaline shape when you're living in an acid-filled world?

The odds start off in your favor: At birth, your body is in perfect metabolic health with an alkaline pH level of approximately 7.5.

To create new cells, your body burns nutrients for food. The residue that's left becomes a highly acidic waste product.

Normally your body can eliminate this acid waste build up. But...

...As you get older, you can't remove acid waste as effectively — so it accumulates and gets stored in your tissues. That's when your pH balance takes a turn for the worse and changes from alkaline to acidic.

Now to add insult to injury...

What is pH?

It stands for "potential of Hydrogen." In other words, pH is the amount of hydrogen ions contained in a particular solution.

The lower the pH number, the more acid the solution. The higher the number, the more alkaline. The pH level is measured on a scale of 0 to 14 with 7.0 being neutral. For example, a pH of 3.0 is more acidic than a pH of 5.0.

The most critical pH is in your blood. All other organs and fluids will make constant adjustments and sacrifices to keep your blood to a strict pH between 7.35 and 7.45.

...Your body is bombarded by acid from day-to-day living:

- **Acid rain** — turns drinking water highly acidic — and dangerous to your health!

- **Air pollution** — fills your lungs with toxins and acid residue. Even smog containing hydrocarbons and nitrogen oxides can raise acid levels in your body!

- **Prescription drugs** — leave acid residues in your cells for years after you've stopped taking them!

- **Pesticides and food additives** — bog down your cells with synthetic acid-producing residues!

- **Poor diet** — fast foods, "enriched" foods, and fried foods are acid forming!

- **Your home** — contains synthetic materials in furniture, carpets, and upholstery that emit acid-based gases such as formaldehyde, benzene, toluene, and xylene!

No wonder leading research journals and medical studies report that acid build-up is a #1 health hazard!

In fact, noted body chemistry expert, Dr. Theodore Barody, author of *Alkalize or Die*, made this astounding discovery:

"The countless names attached to illnesses do not really matter. What does matter is that they all come from the same root cause... too much tissue acid waste in the body!"

And leading researchers and medical journals confirm Dr. Barody's discovery:

American Journal of Clinical Nutrition

■ Bone loss... joint pain... and hip fractures!

A seven-year study conducted at the University of California, San Francisco, on 9,000 women showed those who suffer from chronic acid overload are at greater risk for bone loss than the ones with normal pH levels.

The scientists also reported that many of the hip fractures common in middle-aged women are a result of

(Next page please...)

high acid levels in the body.

Why does acid attack your bones? Well think about this:

When your body is in acid overload — it tries to do everything it can to restore pH balance. That means your body turns to its natural alkaline storehouse — your bones — to help neutralize that acid!

But removing alkaline nutrients like calcium, sodium, and potassium from your bones makes them weak — and leaves you prone to fractures and joint pain!

And please know this: You may not even be aware you have a mineral deficiency until most of the damage is done. That's because symptoms of calcium deficiency are not evident through X-ray examinations. It only shows up after nearly 40% of the calcium in your bones has already been lost!

"Don't be fooled by this huge calcium hoax!"

"Americans consume more calcium-rich dairy foods than almost every other nation and we have one of the highest rates of bone loss. There's a disconnect here. Dairy may be rich in calcium, but most dairy foods also produce an acid yield."

—Loren Cordain, Ph.D., professor and researcher,
Department of Health and Exercise Science
at Colorado State University, Fort Collins

So does this mean you have to give up all dairy products to experience optimum health? Not at all! The key is to balance out acidic foods with high alkaline nutrients! And you can do that by taking Ultimate pH Balance™ everyday! Just four drops in each glass of your daily drinking water is all you need!

Diabetes Care

Surprising cause of blood sugar imbalances!

Researchers have discovered when acid wastes accumulate in the pancreas — it prevents your body from creating proper levels of insulin and that can lead to serious blood sugar imbalances!

After years of fighting acid attacks your pancreas starts to give out. That's why your odds of developing blood sugar problems increase after the age of 40! But there's good news...

...You can help prevent blood sugar problems by flushing out acid waste in your body by drinking water every day. But please be aware: Not just any ordinary water will do the job! Here's why...

A study reported in the peer-reviewed journal, *Diabetes Care* reports water acidity is directly linked to the development of blood sugar

problems. And the truth is: Most tap water has **TOO MUCH ACID** in it! Here's the proof:

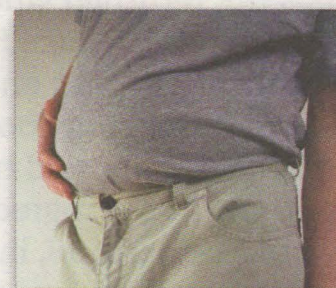

The study, led by Dr. Lars C. Stene, tested tap water from the homes of 64 patients with blood glucose problems and from 250 patients with normal blood sugar levels. The results?

People drinking water with high acid levels were **FOURTIMES** more likely to develop glucose and insulin problems!

Seoul National Medical University

Digestive problems!

Fifteen patients who suffered from chronic constipation for over a year were monitored in

this study performed by medical practitioner, Byung Ihn Choi, M.D., Ph.D. He reported that symptoms of constipation nearly disappeared when patients drank alkaline water for one to two weeks. Here's one major reason why:

By lubricating the wastes on the walls of the large intestine — excretion becomes easier! Makes sense, doesn't it?

The patients not only reported significant improvements in bowel elimination, but many also experienced better mental alertness, too!

The Royal Free Hospital and School of Medicine in London

Colds and respiratory problems!

Here's something you absolutely must know: Bacteria **HATE** an alkaline pH environment! That's why

the results from a study at the *Royal Free Hospital and School of Medicine in London* makes perfect sense. They report: When you raise your pH level — you increase your immune system's ability to kill bacteria!

Viruses and bacteria that cause colds and respiratory problems thrive only in an acidic environment. Eliminate that nasty environment and you yank out the welcome mat for those health-destroying critters!

Journal of International Medical Research

■ Bladder problems!

If you've ever had a bladder infection — I don't need to describe that painful, burning sensation when you try to pee. It's just awful, isn't it?

Well, according to the *Journal of International Medical Research*, when you increase your pH levels — you LOWER the risk of urinary tract infections and reduce symptoms of cystitis!

A popular remedy is to drink

“Acid pH is so corrosively destructive that it is considered a seedbed for most, if not all, degenerative diseases including heart disease, diabetes, obesity, premature aging, and osteoporosis.”

—Dr. Lawrence Hatchett, M.D.,
Harvard University — Fellow

“The countless names of illnesses do not really matter. What does matter is that they all come from the same root cause... too much tissue acid waste in the body!”

—Theodore A. Baroody,
N.D., D.C., Ph.D.

cranberry juice. That's because the concentrated juice helps prevent bacteria from clinging to the walls of your bladder. But there's also another, natural alternative you may not be aware of:

The study participants found they experienced relief from their symptoms — and even some clearing of infection by taking 4 grams of sodium citrate, an alkalizing agent, in a glass of water. They drank it three times a day for two days.

Here's how to clobber acid overload and experience genuine alkaline health!

By now, I think you see the secret to eliminating acid overload that can trigger joint pain... blood sugar imbalances... low energy... poor circulation... high and low blood pressure problems... premature aging... and other “old age” problems is to boost your levels of powerful

Acid overload creates abnormal cells!

In his theory of acidic cells, noted Japanese scientists Dr. Airashi reported that healthy cells living in an acidic environment will mutate into abnormal cells.

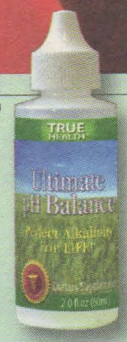

And even though surgery can eliminate abnormal cells — these cells can reoccur because the acidic environment still remains after the operation!

What's keeping you **fat**?

Acid overload — that's what!

Your body will do just about anything to protect itself from acid overload — even if it means gaining 10... 20... 30 pounds or more! Here's what I mean...

Acid can literally eat away at your vital organs — including your heart and brain! So as a defense mechanism, your body sends the signal to **make more fat**. Why?

Because fat cells store additional acid away from your critical organs. Those fat cells and cellulite deposits are packing up the acid and trying to keep it a safe distance from your organs — that's why they usually settle around your belly, butt, arms, and thighs!

Many folks taking Ultimate pH Balance™ find losing weight much easier. That's because Ultimate pH Balance™ helps eliminate acid overload. Without excess acid — your body stops storing fat — and allows you to burn it off naturally!

"The human body requires at least 60 minerals for optimal health"

Gary Price Todd, M.D. — author of *Nutrition, Health, and Disease* and *Acquiring Optimal Health*

But research shows **most Americans only get about eight minerals** in any significant quantity from the foods we eat today! Why?

By not eating enough fresh fruits and vegetables! An article printed in the *American Journal of Public Health* reported that a large proportion of U.S. adults eat **no vegetables or fruit on a given day!**

Mineral-depleted soil! Even if you do eat fruits and vegetables — the soil used to grow these crops is seriously lacking essential minerals and nutrients!

Chemical processing! Heating, freezing, and microwaving foods destroy essential minerals!

So, how do you make up for the mineral deficiencies in your food?

With Ultimate pH Balance™! With every serving of Ultimate pH Balance™, you get 72 trace minerals to help you achieve perfect alkaline balance.

The exclusive processing of Ultimate pH Balance™ keeps all 72 nutrients in an organic colloidal state — that means these minerals are ready and able to go to work for you quickly — to help make up for any current mineral deficiency.

In every serving of Ultimate pH Balance™, you get:

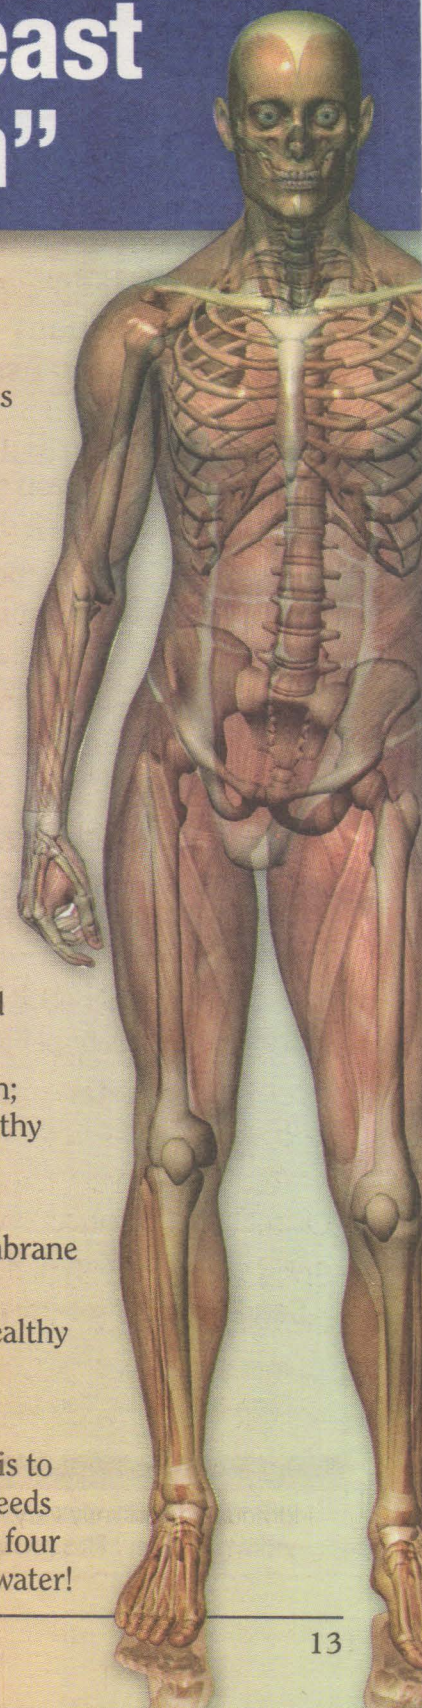

- **Phosphorous:** Helps repair damaged cells and grow healthy new cells.
- **Zinc:** Powerful wound mender; critical for the production of white blood cells in your immune system.

Send for your introductory pack of Ultimate pH Balance™ today! See page 18 and discover how to get 17 FREE gifts too!

- **Iodine:** For healthy thyroid function; converts beta-carotene to vitamin A.
- **Selenium:** Powerful antioxidant; helps vitamin E protect cells and body tissues by destroying free radicals.
- **Copper:** Essential for hundreds of proteins and enzymes to function properly; aids in absorption of iron.
- **Manganese:** Powerful antioxidant; helps build healthy bones.
- **Chromium:** Regulates the breakdown of sugar and carbohydrates; helps promote healthy insulin production necessary for producing healthy cholesterol and fats.
- **Molybdenum:** Critical for healthy nervous system; strengthens tooth enamel and helps fight decay.
- **Calcium:** Helps create healthy teeth and bones; helps regulate nerve behavior.
- **Magnesium:** Key for enzyme production; helps relax muscles and promotes healthy bowel function.
- **Boron:** Helps metabolize calcium and magnesium; essential for healthy membrane function.
- **Cobalt:** Stimulates manufacturing of healthy red blood cells; helps control appetite.
- **And 60 more trace minerals!**

The best decision you can make today is to give your body the optimum minerals it needs to keep you healthy! And all it takes is just four drops in each glass of your daily drinking water!

and can say that the terrible itch I had all over my body has been considerably reduced. Also, a digestive problem I had for quite some time seems to have been improved. My pH balance was 5.5 and is now 6.6. I consider this good progress for the short time, especially since I am 80 years old."

—Hildegard K., Naples, FL

I want you to see and FEEL the difference Ultimate pH Balance™ can make on your health — and also claim up to 17 FREE gifts — valued at \$362.39!

If you're reading this report, I know for sure you're interested in experiencing optimum health. And as a doctor, I can tell you without a shadow of a doubt: The best way to IMPROVE... and help AVOID health problems like stiff joints... low energy levels... blood sugar imbalances...

Here's how to turn ordinary water into a fountain of healing!

You know water is good for you right? That's probably why you drink four... six... or eight glasses or more each day!

...But a study in the medical journal, *Diabetes Care* reports that ordinary drinking water contains too much acid — and can trigger a host of health problems, including blood sugar imbalances!

Most drinking water is highly acidic — at levels of 6.0 or lower!

Remember, the higher the pH of the water — the more it can help you raise your pH level. In other words, a water pH of 8.0 can help you heal better — and faster — than a lower pH level!

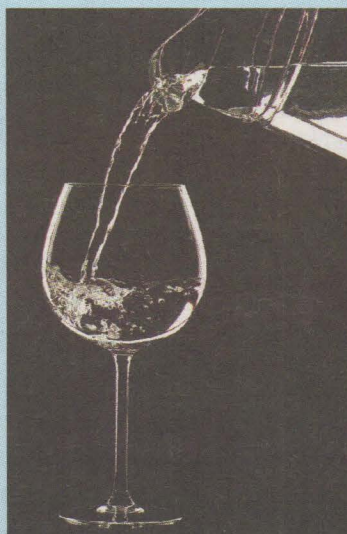

Now take a look at what the lab results showed after drops of Ultimate pH Balance™ were added:

Type of water	Starting pH	4 drops	7-8 drops
Tap	7.92	8.65	9+
Bottled	7.32	8.58	9+

See how easy it is to turn ordinary water into a fountain of healing!

"I use Ultimate pH Balance™ daily in my drinking water. I have not gotten sick at all in the last few years. I am in good health at age 70 and take no medicines at all. I feel like a teenager!"

Alexander H. of Honolulu, HI says...

"Wish I knew about it sooner"

"I really like Ultimate pH Balance™. My blood pressure has really been good. I have more energy and have switched to more alkaline food. Wish I had known about this product when I was younger. When I had my triple-bypass at age 60 my doctor said I had a body of a 40 year old and knew I'd have no problem with the surgery. If I had your product, I would not have had the operation. Thank you."

And Ann A. from Far Rockaway, NY is thrilled because...

"My doctor said I didn't need my drugs anymore!"

"Five months ago I

was taking eight to ten different prescriptions for eight medical ailments. Two weeks ago at my monthly check-up, my doctor patted me on the back and told me that 'month-by-month' my health was improving. The next thing he said was a surprise to me: 'Stop taking these prescriptions — my blood pressure is 120/80 — heart and lungs are perfect.' At the age of 91, I am truly blessed! I am healthier now than I was as a teenager, thanks to Ultimate pH Balance™. At my next monthly check up, I plan to tell my doctor the reason for my 'Bill of Health' report."
