

Announcing the First REAL Breakthrough for **PAIN-FREE JOINTS** *in MORE than a Decade!*

- Brings FAST, lasting relief for aches, pain, stiffness and swelling
- Builds totally NEW joints—cartilage, bone and muscle
- Lets you get back to doing the things you love again—with ZERO risks and side effects!

Supported in part by Grant #1R43 AG024733-01 from the US National Institutes of Health to Rainforest Inc.

BRUCE DOOLEY, M.D.
Practicing physician and leading advocate of the most effective, non-toxic advances in the field of medicine

“In the future, this is how ALL doctors will deal with joint and back discomfort.”

But YOU don't have to wait...See inside now!

Sick of living with stiff, worn-out joints that hurt every time you move?

You're about to discover a NEW dual joint breakthrough that can bring you fast, lasting relief in as little as *one week!*

Dear Friend,

From this moment on, forget all the remedies you've tried before to make your joints stop hurting. Forget all the times your doctor has told you to simply learn to live with the pain.

That's because you hold in your hands the answer to your prayers that will finally let you break FREE from joint pain.

The stunning discovery I'm about to reveal is such a giant leap forward, it's making the way doctors deal with joint problems obsolete. As I'm about to explain, it not only can bring you fast, lasting relief for sore, swollen joints, but also help you build stronger, more flexible joints than ever before!

Blockbuster discovery wins prestigious award from NIH scientists

This blockbuster joint discovery, called **Flexagene**, is so extraordinary, it's attracted the attention of one of the most prestigious medical institutions in the United States: the National Institutes of Health (NIH).

In fact, it just won an "Innovation in Research" award from NIH's National Institutes on Aging. This puts **Flexagene** in the same league as new cutting-edge pharmaceuticals, diagnostic tests and medical procedures.

Flexagene contains two newly-discovered plant compounds that do what NO other joint solution has been able to do before:

Supported in part by Grant #1R43 AG024733-01 from the US National Institutes of Health to Rainforest Inc.

- #1. Turns OFF inflammation at the source...and the joint aches and stiffness that go with it, PLUS...
- #2. Turns ON total joint repair...cartilage, bone and muscle...for new, "young again" joints!

What's even better, **Flexagene** gives you lasting relief fast. Research shows this dual-action breakthrough works up to six times faster than glucosamine and chondroitin sulfate. That means you can enjoy blessed relief for stiff, aching joints in as little as one week!

Give joint pain a one-two punch with Flexagene

Now, for the first time ever, this dual-action wonder is available to you in a breakthrough supplement called **Flexagene**.

I've just started using this groundbreaking formula with my patients... and have already seen incredible results!

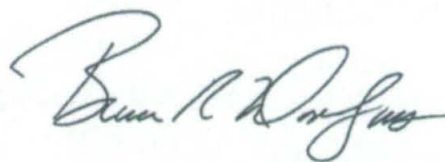

For the first time in years, people who have put up with debilitating joint and back aches are now waking up pain-free and getting back to doing the things they love.

I'm convinced **Flexagene** can do the same for you.

Why bother with ancient or even last century's joint "breakthroughs" when you can use the first REAL breakthrough for pain-free joints in over a decade?

Turn the page to learn MORE about this amazing new formula...your joints will thank you for it!

Yours in healing,

Dr. Bruce Dooley, M.D.

P.S. Renewed joint comfort can be yours in as little as one week! Request your Risk-Free Trial Supply of **Flexagene** today and see for yourself. Your 100% satisfaction is guaranteed. Plus, you'll get up to four FREE gifts!

These statements have not been approved by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

Joint Breakthrough #1:

***We finally* know how to turn OFF agonizing swelling!**

If your knees ache when you get up from sitting...if your legs stiffen up when you're driving...if your shoulder throbs with pain when you try to sleep...chances are *inflammation* is to blame.

Inflammation is your body's first defense against infection... but it can also be your joints' **WORST** enemy. Here's why...

Most of the time, inflammation is a lifesaver. It allows your body to fend off disease-causing bacteria, viruses and parasites when you get a cut, a stubbed toe or other trauma or injury.

As soon as a part of your body is injured, it triggers inflammation. Inflammation is a cascade of events in which your immune system wages a war on invading pathogens.

An army of disease-fighting chemicals and immune cells floods the site of injury and launches a counterattack, wiping out both the invader and any tissue it may have infected. It's as if the entire area is set on fire—and just as quickly put out, leaving nothing but scorched earth behind.

The mystery of stiff, aching joints...solved at last!

Every once in a while, however, the fires of inflammation don't burn out like they're supposed to. Scientists still don't know exactly why. It may be a genetic predisposition—or it may be due to

Enjoy gardening again now that you can use your hands without pain and swelling!

smoking, exposure to toxins, or unrelated health conditions.

In any event, these smoldering fires of inflammation become *chronic* rather than temporary. This causes your body to turn on itself, bombarding the tissues it thinks are injured with inflammatory enzymes like collagenase and elastase.

These enzymes chew up healthy as well as damaged tissue—such as the cartilage, bone and muscle that make up your joints. As they build up, they make your knees ache after too much walking...stiffen up your back and neck when you're sleeping...and inflame your shoulders and hips so it hurts just to move.

How to defeat your joints' WORST enemy

Until now, there's been **NO** way to turn off this non-stop fire in your joints once it becomes chronic. While there are some therapies like aspirin, NSAIDs and certain prescription medications that block inflammatory enzymes like COX-2, they only provide temporary relief.

Plus, these medications often cause side effects—like stomach upset, diarrhea and even internal bleeding—that can be worse than the aches and pains you take them for in the *first* place.

Some natural remedies such as white willow or

or ginger can help lessen inflammation, but they don't shut off the root source. That's why they *don't* work for everyone, or simply lessen your pain instead of making it go away completely. And two of the most popular natural joint remedies—glucosamine and chondroitin sulfate—do *nothing* to stop inflammation.

But now after years of intensive research, scientists have discovered a new natural therapy that actually turns OFF inflammation that's run amok in your body. It's called Vincaria and it's a patented extract of *Uncaria guianensis*, a large, woody vine that grows in the Amazon rain forest.

Long prized by South American Indian tribes as a treatment for inflammation and joint disorders along with other uses, *Uncaria guianensis* has caught the attention of scientists around the world.

In recent years, they've discovered several groups of plant chemicals that account for many of the plant's anti-inflammatory actions. The problem is, some of these plant chemicals can overstimulate your immune system and make inflammation *worse*.

Through extensive research and testing, scientists were able to isolate the most potent anti-inflammatory chemicals found in *Uncaria guianensis*. They were also able to leave out those that can put your immune system into

overdrive and make the fires of inflammation burn even harder.

Put out the fire in your joints with Flexagene!

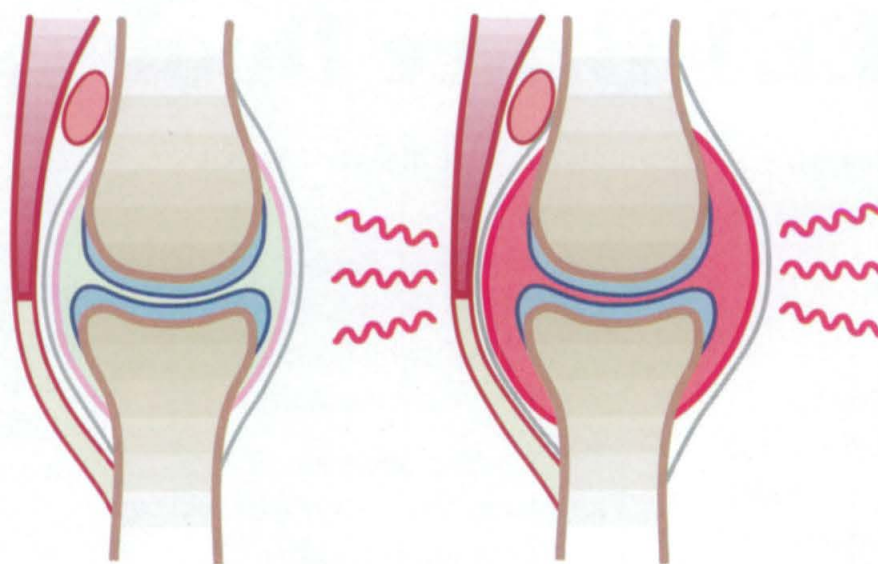

Researchers put these powerful, inflammation-fighting compounds in the Vincaria you get in Flexagene. It works by turning off a gene that's the most important protein in turning off your body's inflammation "switch". This is the first time any natural substance has been found to turn OFF inflammation at its source!

But it doesn't turn off this switch completely. Instead, Vincaria helps your body's defenses work

the way they're supposed to. It's like setting your immune system to just the right level. So you destroy disease-carrying viruses, bacteria and other invaders—*without* destroying your joints!

Now people like YOU can finally get the maximum joint-soothing relief to help you break free from pain! Vincaria is the **ONLY** known therapy—natural OR drug—that can put out the fires of chronic inflammation once and for all.

What's Really Making Your Joints Sore and Swollen?

Normal, pain-free joint with no swelling.

Swollen joint under attack by painful inflammatory enzymes.

Inflammatory enzymes attack your joints, making them stiff and swollen. The Vincaria you get in **Flexagene** turns off chronic inflammation, so your joints become flexible and pain-free once more!

(continued on page 6)

Enjoy safe, lasting relief in as little as ONE week!

Imagine...no more stiffening up when you sit. No more wobbling when you stand up. And no more restless nights trying to get the pillows just right so you can sleep.

Each morning you'll jump out of bed and start your day pain-free. Your joints will bend and move easily, so you can do what YOU want to do. Whether it's gardening, hiking, fishing, tennis, shopping or jogging, you'll no longer be stopped by swollen, achy joints!

Best of all, you'll notice all of these wonderful changes in as little as *one week!* In fact, a recent double-blind, placebo-controlled study published in the medical journal *Inflammation*

Research confirms just how fast Vincaria stops painful swelling.

Within one week of the trial, those patients taking the *Uncaria guianensis* extract enjoyed significantly greater improvement in joint pain when active compared to those taking a placebo. What's more, the extract was found to be just as safe and side effect-free as the placebo!

Vincaria is one of two powerful joint breakthroughs in Flexagene, available to you now exclusively as part of this limited market test. You won't find this extraordinary new formula anywhere else!

Turn to page 19 to request your Risk-Free Trial Supply...along with up to four FREE gifts!

MEET Bruce Dooley, M.D.

- Graduate, St. Joseph's University (B.S.), Villanova University (M.S.), and Thomas Jefferson University Medical School (M.D.)

in preventive and nutritional medicine

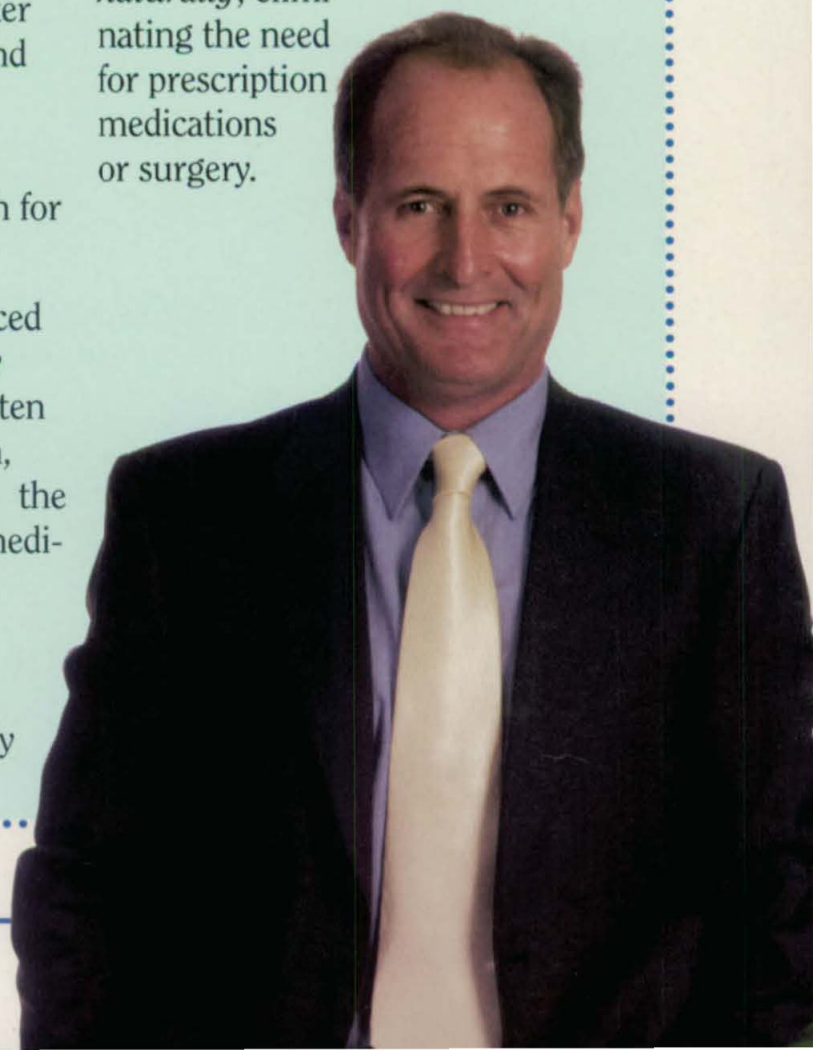

- Author of *Perfect Health Forever* and sought-after speaker on the benefits of alternative and complementary therapies

- Leading advocate of Flexagene, a new breakthrough for promoting joint health

Dr. Bruce Dooley has practiced medicine for more than twenty years. His practice for the past ten years has involved consultation, diagnosis and treatment using the latest advances in the field of medicine.

Dr. Dooley specializes in complementary or alternative medicine, which treats the body

as an interconnected whole. His approach to treating most medical problems is to restore function *naturally*, eliminating the need for prescription medications or surgery.

Joint Breakthrough #2:

We finally know how to turn ON *total* joint repair!

When bone rubs against bone, or vertebrae rubs against vertebrae, you're hit with the most wicked, teeth-gritting joint and back pain of all.

That's because as you age, the protein content of joint cartilage decreases. So each time you put pressure on your joints, it causes cartilage to flake off or crack.

Eventually, the cushioning between your joints and tendons thins out completely, so you grind bone into bone every time you move. This causes your bones to wear down, making you more prone to injury. At the same time, the collagen in your muscles starts to break down, so you don't flex and bend like you used to.

After a while, your joints simply don't work anymore. You're left unable to perform even the most basic tasks—like getting dressed or standing up from a chair—without wanting to shriek out with pain.

Rebuild your joints into “like new” condition

What if you could turn back the hands of time...and rebuild your joints into “like new” condition?

RNI 249—the second extraordinary joint

breakthrough you get in Flexagene — actually helps you build totally NEW joints. It makes every part of your joint—cartilage, bone *and* muscle—stronger and more flexible.

This incredible joint-building nutrient is a patent-pending extract of *Lepidium meyenii*, an unusually hardy plant that grows in Peru's Junin Plateau. Very little plant life can withstand these extremely high altitudes of 10,000 to 15,000 feet, where subzero temperatures, oxygen-thin air and rocky soil prevail.

Flexagene makes *every* part of your joint stronger and more flexible—so you can bend and move as if you were decades younger!

That's why Incan warriors believed *Lepidium meyenii* had legendary powers, and feasted on its root before going into battle. In fact, it's still used today by Peruvian men, women and children for added strength and endurance to survive the high altitudes and

life's physical demands.

Now this amazing plant's most potent compounds have been isolated and put into RNI 249, so they can help *your* joints grow stronger and more resilient as well. In fact, this breakthrough nutrient can help you feel and move like you did when you were decades younger! *Here's why...*

Turns up your body's levels of "youthing" hormone

Over time, your body's production of a crucial growth factor drops dramatically. This "youthing" hormone—known as IGF-1 (Insulin-like Growth Factor-1)—is what helps you build lean muscle, burn stored fat and maintain smooth, supple skin so easily in your youth.

As you approach mid-life, your body naturally produces less IGF-1. By the time you hit your later years, the amount flowing through your body can plummet by as much as 80% from its peak.

IGF-1 affects just about every cell in your body, not just those in muscle tissue or skin. It's used to build bone mass. It's used to normalize blood sugar levels. And it's used to activate sex hormones like estrogen and testosterone, needed to produce sexual desire.

It's no wonder as your IGF-1 level drops, it's not just your joints, bones and muscle tone that suffer. Your youthful looks, sexual performance and overall vitality start to fade as well.

Until now, the only way to increase the amount of IGF-1 in your body was to have a

doctor give you repeated injections of human growth hormone (HGH). But at upwards of \$375 a pop, they can cost a fortune!

Plus since HGH can't be absorbed directly into cartilage, bone and other joint tissues—where it's needed the most—it takes far longer to see any effect on your joint comfort and mobility.

That's why getting HGH injections can end up being a big waste of money and time for many people struggling with joint problems.

RNI 249 makes EVERY part of your joint strong and flexible again

That doesn't mean you have to simply put up with worn-out joints. An extraordinary breakthrough has been found to stop the ravages of aging that steal away your joint mobility and youthful vitality.

Thanks to the second NEW breakthrough in Flexagene, you can now turn up your body's production of IGF-1 to youthful levels, no matter what your age. And turn ON *total* joint repair!

Flexagene naturally boosts your body's levels "youthing" hormone, so your joints grow stronger and more resilient.

It's like human growth hormone for your joints— without the shots!

NO other natural or drug therapy has been found to raise IGF-1 levels in your body's tissues. Even human growth hormone (HGH) injections only turns on IGF-1 in your liver. So less of it gets to your joints—and it takes far longer to see a benefit.

Scientists have been searching for years for ways to boost IGF-1 levels naturally. That's why RNI 249 is such an exciting breakthrough.

RNI 249 actually turns ON the gene responsible for producing IGF-1 directly. So the IGF-1 levels in your joints, bones and muscle tissue shoot up to youthful levels once more.

Every part of your joint becomes stronger and more flexible...just like when you were decades younger! You'll be back to jogging, hiking up hills, or golfing 18 holes without taking a break. Your friends will *beg* you to let them in on your secret!

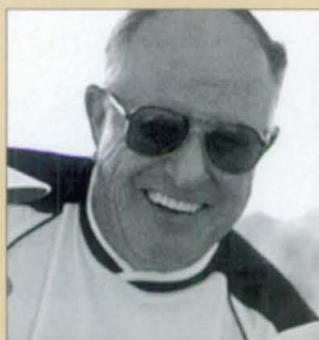

Best of all, you'll say GOODBYE to the grueling agony of worn-out joints. You'll stop taking dangerous medications by the truck-

load that leave you riddled with side effects. And you'll avoid costly surgeries that just make your joint problems worse.

By putting RNI 249 to work for you today, your joints can be on their way to getting younger *tomorrow*. This powerful new breakthrough is available to you now in Flexagene. You won't find it anywhere else!

Simply turn to page 19 to request your Risk-Free Trial Supply...along with up to four FREE gifts!

Once You Start Taking Flexagene, You Could Start Feeling Like This...

"I used to feel like I had a chronic toothache all over my body. Now I don't ache like I used to."

— A.J., Ohio

"Flexagene
really takes the edge off."

— M.H., Alabama

"Thanks for giving me my life back!"

— L.F., New York

Why bother with yesterday's **JOINT HEALTH**

"breakthroughs"

...when you can put this NEW blockbuster joint discovery to work for you instead!

Take a look at these blatant health rip-offs...NONE offer you a total joint solution!

- Glucosamine and chondroitin sulfate can add up to as much as \$30 for a one-month supply. Yet they do little more than stimulate the repair of joint cartilage. And it can take as long as *six weeks* before you feel ANY effect! (If you avoid consuming beef, it might interest you to know glucosamine and chondroitin sulfate is processed from the hooves, hides and bones of cattle.)

- MSM costs as much as \$15 for a one-month supply. Yet it only gives you temporary relief for joint discomfort. It does practically *nothing* to help your joints get stronger and keep the pain from coming back the next time! (MSM is a sulfur compound similar to one used by veterinarians on dogs and horses.)

- Boswellia, white willow, ginger, and other herbs can each run you as much as \$18 for a one-month supply. Yet there is little scientific proof to back up their claims and safety. In fact, some of these herbs contain components whose actions may cancel out those of other components. So you end up with ZERO benefits!

Tired of swallowing pill after pill and *still* putting up with joint stiffness and pain? Sick of spending \$30...\$50...even \$80 a month on supplements that don't work? Fed up with hearing the same empty promises again and again?

It's no wonder.

Take a look at the joint health "solutions" other supplement companies offer you. Glucosamine sulfate, chondroitin, MSM, boswellia, white willow, ginger, to name a few. They're all OLD NEWS!

Sure, they can all provide SOME relief...that is, for SOME of the people SOME of the time.

Meanwhile, millions of others like YOU still suffer from achy, stiff, creaky joints every day...no matter how many costly little pills you swallow!

If you're taking handfuls of pills each day and not seeing your joints get stronger and pain-free, it's time for a NEW breakthrough. It's time for Flexagene...the first REAL breakthrough for pain-free joints in over a decade!

**Finally...a dual-action
breakthrough that stops
swelling and builds
TOTALLY NEW JOINTS!**

Flexagene is the first formula ever to offer you the remarkable dual-action power of Vincaria and RNI 249. Together these two breakthrough nutrients just won a prestigious "Innovation in Research" award from the *National Institutes of Health's Institutes on Aging*.

Scientific studies have appeared in *Inflammation Research, Alimentary Pharmacological Therapies, Phytomedicine* and other medical journals. Clinical trials are just getting underway as well. But here is what's stunning researchers the most about these two extraordinary breakthroughs:

- **Vincaria, a patented extract of *Uncaria guianensis*, is the most potent natural inhibitor of the gene linked to chronic inflammation.** It literally turns OFF inflammation at the source...restoring pain-free, flexible movement in just *days*...with none of the side effects you get with NSAIDs or other anti-inflammatories.
- **RNI-249, a patent-pending extract of *Lepidium meyenii*, activates the gene for IGF-1, which declines with age.** It's the *only* substance

Only Flexagene Gives You a TOTAL Solution for Stiff, Achy Joints!

Therapy	Soothes Aches	Eases Swelling	Repairs Joints	Comments
Glucosamine sulfate			✓	• Limits cartilage destruction only
Chondroitin sulfate			✓	• Limits cartilage destruction only

**URGENT
HEALTH
ALERT!**

Why You Should Just Say **NO** to Conventional Joint Treatments!

Doctors are so busy these days dealing with managed care and other red tape, they barely have time for their patients! And whatever information they do get about new treatments most likely comes from drug company salespeople.

No wonder doctors keep treating patients with stiff, aching joints the same way they always have—with drugs and surgery! But all too often, these conventional treatments fail to deliver...and can even spell disaster.

- **Joint replacement surgery—is it worth the risks?**

For example, more than 300,000 knee replacement surgeries are performed each year. But there

are serious risks, like blood clots in the legs, life-threatening infection, nerve damage, even heart attack and stroke!

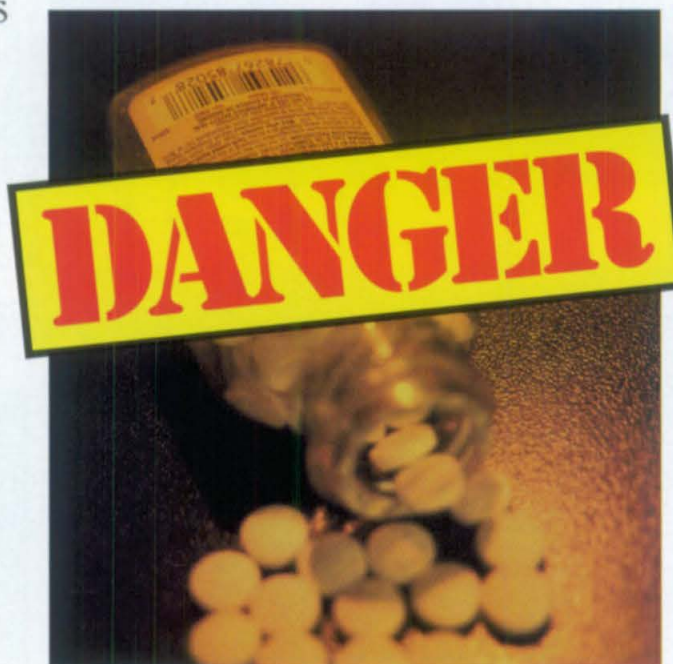

Even if the surgery does go well, many people who've had a knee replaced suffer frequent pain caused by the artificial joint itself. What's more, the metal and plastic parts in your "new" joint eventually wear out, sometimes in as little as 10 years. So you'll have little choice but to go through the whole tortuous process all over again.

- **Over-the-counter painkillers—don't be fooled by their "super-safe" image!**

Many doctors and hospitals recommend over-the-counter painkillers—such as acetaminophen—for temporary relief of joint pain and

swelling. In fact, people swallow these pills by the truckload. Acetaminophen sales alone account for \$1 billion in sales each year!

But shockingly, this "super-safe" painkiller generates *more* calls to Poison Control Centers than any other substance—over 100,000 calls a year! It's responsible for more than 50,000 emergency room visits a year. Even scarier, it's linked to more than 700 cases of liver failure each year—often leading to liver transplant or even death.

More than 50,000 emergency room visits a year are due to "super safe" over-the-counter pain killers like acetaminophen.

• **Prescription drugs—which one will the FDA ban next?**

Prescription anti-inflammatory drugs are considered a standard treatment for joint discomfort. In fact, Americans shell out billions of dollars for them each year. But since they don't shut off the *real* cause of chronic inflammation, they only mask your symptoms. In fact, long-term use has been found to actually speed up the destruction of joint cartilage—so your joints become weaker and *more* prone to injury and pain!

Common drug side effects include nausea, headaches and diarrhea. But they also trigger more dangerous complications like ulcers, blood clots and even cardiac arrest! In fact, one of the biggest-selling anti-inflammatory drugs was just pulled off the market, in spite of generating more than \$2.5 billion in sales each year.

That's because researchers halted a long-term study when they discovered people taking

the drug were *four times* more likely to suffer a heart attack than those taking similar drugs. The Food and Drug Administration (FDA) even issued a public health advisory warning people not to take it!

Which drug will the FDA ban *next*? Why wait to find out? Put an end to your joint stiffness and discomfort—naturally and without side effects—with Flexagene today. Turn to page 19 to request your No-Risk Trial Supply today...and get back to the joys of pain-free living once and for all!

You'll also get up to four FREE gifts, including this eye-opening *World Of Medicine Journal*. With the latest reports from medical schools, universities and medical symposiums about new scientific advances in the conquest of age.

Find out about a new breakthrough that saturates your body with up to 500% Ubiquinone (CoQ10) than any other powder, tablet or capsule and gives you a dramatic boost to your energy.

What Will You Do When You Finally Break FREE from Hurting?

No matter how long your knees, hips, back, neck, fingers, elbows and other joints have been aching, you can now finally break free from hurting...thanks to this exciting new breakthrough!

Flexagene is already helping patients at Dr. Dooley's medical clinics in Florida move, flex and bend more easily and comfortably than they have in years.

Now this amazing formula for pain-free living is available to YOU as part of this limited market test. Simply request your Risk-Free Trial Supply, and you'll get a full 60-capsule supply of Flexagene. In as little as one week, you could feel like a new man or woman!

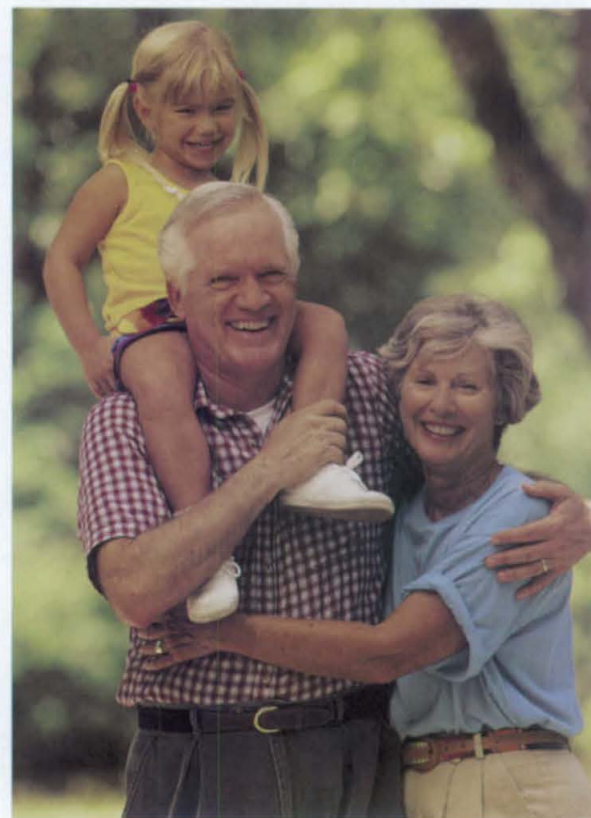

That's how soon most people notice a dramatic difference. In fact, Flexagene works *six times faster* than glucosamine and chondroitin sulfate, which can take as long as six weeks before you notice a benefit—if it works for you at all.

Get ready to live a comfortable, active life without limits!

Think of how your life will change for the better. You'll awake each day feeling full of energy after sleeping deeply and comfortably. You can work in your garden, give your grandchildren piggyback rides, or simply get outdoors and enjoy a beautiful day.

There will be NO LIMITS on what you can do! Plus, you'll no longer have to pop pain pills, put up with bothersome hot pads, or slather on greasy, stinky lotions just to get through the day.

Request your Risk-Free Trial Supply today...and get *back* to the comfortable, active lifestyle you've been missing! Plus, you'll get up to four FREE gifts—including your own precision-engineered, 50-Mile Range Sea & Field Binoculars. A \$79.95 value, *they're yours FREE!*

Get *back* to doing the things you love like biking, swimming and having fun with your family...in as little as one week!

These lightweight binoculars are perfect for your NEW active, pain-free lifestyle. Use them to spot birds, deer and other wildlife. Improve your view at a sporting event, play or concert. Or simply relax on the beach and look for dolphins.

You'll want to take them everywhere! Turn to page 19 to get your FREE binoculars right now.

PLUS...Look at All the BONUS Health Benefits You'll Enjoy!

Studies show the ingredients you get in Flexagene can make a big difference in your joint comfort and mobility in as little as one week. But chances are this won't be the *only* dramatic health benefit you'll notice.

That's because Vincaria and RNI 249 make your *entire* body stronger and healthier—not just your joints. They combat two of your worst health enemies—

- #1: chronic inflammation and
- #2: dwindling levels of IGF-1, the "youthing" hormone.

Extra support for your heart, immune system and brain

For starters, chronic inflammation isn't just bad for your joints. It's now believed to be linked to a wide range of serious health conditions.

It can cause plaque that's built up in your arteries to burst, raising your heart risks. It can transform normal cells into potentially deadly tumors. It can produce inflammatory chemicals in your brain that disrupt healthy cognitive function.

By shutting off chronic inflammation with Vincaria, you'll enjoy enhanced support for your heart, immune system and brain. That's why taking this powerful nutrient could be one of the best things you ever do for your health!

"Young again" bones, muscle tone and sex drive

At the same time your body may be suffering from chronic inflammation, it's also trying to make do with declining levels of IGF-1. Your body needs IGF-1 to promote bone and muscle growth along with other important functions.

As your body's levels of this "youthing" hormone decline, your bones become weaker and more prone to fracture. Your muscle tone becomes flaccid. It can even take a toll on your libido!

By turning IGF-1 production back on to "young again" levels with RNI 249, your bones become stronger. Your muscles become firmer. Even your skin regains its youthful tone. And your sex drive soars to new heights!

These two amazing new discoveries are yours to try now in Flexagene. You'll enjoy renewed joint comfort and flexibility at the same time you're growing stronger, younger and healthier. Request your Risk-Free Trial Supply and get started today!

Why wait another moment to declare your freedom from joint pain? Thanks to Flexagene, you'll get back to the active, comfortable

life you've been missing. Plus, when you respond within the next 10 days you'll get one *more* FREE gift.

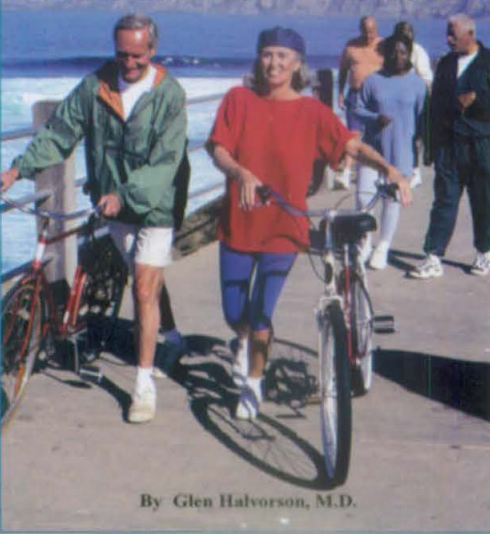

USA RX Health Benefits Card Save a Bundle!

Be one of the first 500 people to request a Risk-Free Trial Supply within the next 7 days and you'll receive great discounts on prescription drugs at thousand's of leading pharmacies like Walgreens (our preferred pharmacy), Eckerd, Target, Kroger, Rite Aid, Publix, Long's drug and Costco... Plus your new Rx discount card gives you up to 75% in discount benefits

As a Priority Status Customer you get instant access to a world of "insider" savings and little known "professional courtesy" discounts on all kinds of things that help you stay fit and healthy. SPECIAL REPORT
The Gift From Nature For The
Freedom Of Pain!

The Gift From Nature For The Freedom Of Pain!

By Dr. Glen Halvorson, M.D., Researcher and formulator of OlyJoint

There's no reason for you or a loved one to spend another minute suffering from joint pain. In this NEW special report, you'll discover why scientists consider OPC to be the most significant health breakthrough of the twentieth century for promoting joint health. Dr. Halvorson explains in detail how to enjoy the maximum benefits from these groundbreaking discoveries... so you can live the active, pain-free life you deserve!

Yours FREE!
\$19.95 Value

You'll discover:

- **The best way to rebuild damaged joint cartilage.** Make your joints "good as new" with this new repair breakthrough.
- **What really causes your joints to get old prematurely.** How to promote joint healing at the cellular level and say goodbye to stiff, creaky, achy joints forever!
- **The hidden cause of joint inflammation and pain.** Get rid of it and put an end to your suffering once and for all.
- **How to minimize pain and swelling after surgery.** The safe, natural remedy that brings blessed relief and helps you heal *faster*.
- **Nature's most powerful pain blocker.** Stop pain *before* it starts... and spare yourself the agony!
- **Pain-curing secrets of professional athletes.** What the "pros" do to cope with pain and maintain peak performance day in and day out.
- **How to soothe inflamed joints... and boost your immune system, too!** Why chronic inflammation is linked to a host of serious diseases... and how to supercharge your body's natural defenses.
- **The truth about pain and sleep.** How to reduce pain naturally so you get to sleep faster and sleep more soundly.
- **Good news for couch potatoes!** Keep your joints limber and mobile *without* exercise.
- **Plus much, much, more!**

50-Mile Range Sea & Field Binoculars... Just Right for Your Active, Pain-Free Lifestyle!

Ideal for sports fans, nature lovers, theater goers, boat owners, travelers, hunters and airplane pilots, these lightweight binoculars are precision-engineered to maximize your field of vision. They're so powerful, you can sit in the grandstand and lipread a quarterback calling signals across an entire football field.

Check out these great features:

- Wide-angled eye piece for extra large field of vision up to 50 miles in range!
- Extremely lightweight with ergonomic controls for comfortable, long-term viewing
- The adjustment wheel's broad grooves make it easy to handle even with gloves
- Rapid focusing, even with one hand for razor-sharp viewing at that crucial moment
- Durable housing made of rugged materials that stand up to the elements
- Soft, flexible rubber eyecups allow for full range of view even if you wear glasses... *and more great features!*

Fast-Response Bonus!

Request Your Flexagene Risk-Free Trial Supply in the Next 7 Days and Get One More FREE Gift...

USA Rx Health Benefits Card

Now, you get great discounts on prescription drugs at thousand's of leading pharmacies like Walgreens (our preferred pharmacy), Eckerd, Target, Kroger, Rite Aid, Publix, Long's drug and Costco... Plus your new Rx discount card gives you up to 75% in discount benefits on: vision care from **US Vision Plan** and from **25 Dollar Eyeglasses**, hearing care from **Tru Hearing**, teeth whitening from **Pro Smile** and LASIK surgery from **Amerisight**. The card even gets you a discount on helping you quit smoking thru **Smoking Cessation**. We add great benefits all the time. We have recently negotiated a discount with **Doctor On Call** so you now have 24 hour access to board certified physicians who are ready to tackle your toughest medical questions.

There's NO physical exam to take...NO membership fees or dues to pay...and NO co-payments to worry about. You don't have to have medical insurance or be enrolled in Medicare to participate. And it does not matter if you have prior medical conditions. In other words, **THERE ARE NO STRINGS ATTACHED.**

As a **Priority Status Customer** you get instant access to a world of "insider" savings and little known "professional courtesy" discounts on all kinds of things that help you stay fit and healthy. Yes, these are the same discounts that others pay up to \$59.95 per month for....but with your special VIP status, your whole family can take advantage of this program absolutely FREE!

An Important Promise to You from Swiss Labs

Your 100% No-Risk TRIPLE Guarantee!

Flexagene is guaranteed to make a noticeable difference in your health... or your money back!

GUARANTEE #1: With your Risk-Free Trial Supply, you're just days away from enjoying improved joint comfort, flexibility and freedom of movement. Try it for as long as you like - entirely at our own risk!

GUARANTEE #2: Every bottle of **Flexagene** is unconditionally guaranteed for quality, purity and potency. If you are ever less than 100% satisfied at any time, you can return it within 30 days for a full refund of the product price - even if the bottle is empty! *No questions asked.*

GUARANTEE #3: Your FREE gifts and fast-response bonus are yours to keep, even if you return your Risk-Free Trial Supply for a full refund. That's how certain we are you'll love the results you see with **Flexagene**. ***YOU RISK NOTHING! You have our word on it.***
