

WORKING LIKE A HORSE: Professional horse trainer Hank Clason will tell you horse training is hard work. "After years of handling 12,000 horses, my shoulders, back and knees really bothered me. I started using new Trigosamine and I started feeling great, in fact my whole body felt great," said Clason. "Trigosamine is great stuff. It's moving around like a hot again."

Powerful pill gives people freedom from sore joints

100% of clinical study participants taking remarkable joint health supplement say joints feel better

UMS - Wouldn't it be great if there was a safe and effective pill you could take every day that would give you the freedom to move around better and feel great? And wouldn't it be great if it started working in just days?

Now just imagine how wonderful it would be to do the things you love without the nagging aches and achiness in your joints.

Well Hank Clason, a professional horse trainer from Medina, Ohio doesn't have to imagine anymore. He heard that pill and it's called Fast Acting Trigosamine. And he's thrilled with his results.

"I was at a horse show trying to saddle up a horse and my shoulder was killing me," said Clason.

"One of my clients saw I was hurting and gave me a bottle of Trigosamine. He told me to go ahead and try it because it works great for me. It's usually pretty medical about being told I like this but figured what the heck, I had nothing to lose, so I started taking the pills," said Clason.

"You ain't ever glad I did it no more at all my shoulder started feeling a lot better. As a matter of fact, my whole body felt great. Then I can cut off pills and stopped taking it and sure enough my shoulder started aching again. Well I hurried up and started taking it again for I was supposed to and in just a few days the soreness started to go

away again," he said.

Clason then added, "It's never run out of Trigosamine again. It works really great for me."

Fast Acting Trigosamine is a breakthrough joint health supplement that has people across the country excited.

This joint pill's powerful claims are all backed by a recently completed randomized, double-blind, placebo-controlled clinical study which is considered to be the gold standard for joint health supplements.

The results of this study were amazing. The clinical data confirmed that 82% of the participants said they began to feel better just days after taking the recommended dosage. And unlike no pill works for everyone, 100% of the clinical participants taking Fast Acting Trigosamine reported their joint comfort had improved just half-way through the clinical study!

"The clinical results were simply incredible," said Dr. Joseph DiDella.

"Our goal was to develop a formula that would give people quick results, and based on the clinical results along with the feedback we're getting from consumers (I'd say we hit the bullseye with this supplement)," said Dr. DiDella.

"I've never seen relief like this before. This pill is going to be a lifesaver for people that suffer with joint discomfort," he added.

Scientists developed the breakthrough joint health supplement Fast Acting Trigosamine by combining three powerful compounds: Boswellin[®], Hyaluronic Acid[®] and Glucosamine HCl[®]. These compounds have been clinically shown to work together to improve a person's joint mobility and overall joint comfort.

Rapaflex is a proprietary blend of patented ingredients that have been clinically shown to improve overall joint performance. One of the blend's key ingredients actually increases the speed in which some nutrients get absorbed which keeps the body to use them faster.

Glucosamine is also part of the complete Formula. It's one of the most tested and medically trusted joint health ingredients available to consumers. Over the years, it's been clinically proven to rebuild cartilage which work like "shock absorbers" in the joints.

And the last key ingredient is chondroitin which is a building block of "human joint oil," also known by medical professionals as synovial fluid.

This remarkable molecule can absorb up to 1,000 times its own weight in water which helps to lubricate the joints which reduces friction and stiffness allowing for effortless, comfortable motion. This added lubrication is essential for people who want to get moving.

"Synovial fluid is part of what allows young people to be highly active without getting sore joints. But as we get older our bodies produce less of this slippery fluid which can force

bones and joints to grind together causing nagging discomfort," said Dr. DiDella.

Hank Clason is not the only one who's getting great results. The company reports that it gets feedback from satisfied customers just about everyday.

Drug Gilly a 72-year-old seasonal fisherman from Orlando, Florida swears by Trigosamine.

"All the years of fishing had taken its toll on my body. In particular, my hands and knees always seemed to be hurting me and it was getting really tough for me to fish," said Gilly.

"I was taking 2 pills once a day like the directions said and during the very first week the soreness in my hands started to go away. And then, just a couple days later the 'bumping' in my knees stopped. It's made fishing fun again. Now I'm using my hands and getting in and out of the boat so much better," said Gilly.

"I plan on doing a whole lot more fishing now that I found Trigosamine," added Gilly.

With product flying off the shelves everywhere, the toughest part now might just be for people to find it.

The company that developed Trigosamine, Paracell[®] has reported that national drug store shipments are being delivered on a daily basis. The company has confirmed that Walmart, CVS/pharmacy, Rite Aid and

Walgreens have all placed orders, but as of right now there's no way for the company to know exactly which stores have product on their shelves.

"Until we're 100% certain that every store has Fast Acting Trigosamine in stock, we'll ship it directly to people's homes," said Paracell's Director of Operations Dana Miller.

To make it easier for people to get Trigosamine right away, we've set up a National Order Hotline that makes for the next 48 hours everyone that gets through will get it and as an added bonus they'll also qualify for special pricing," said Miller.

"We've been advised that there are pharmacies across the country that don't have it yet, so for those that want to be sure to get Trigosamine they should call 1-888-593-2170. All they have to do is give me the order priority approval code T06M4 when they call and we'll take care of the rest," added Miller.

That's going to make the next 48 hours really important for local readers. Those who want this remarkable joint health supplement and are lucky enough to beat the 48-hour cut-off can get this pill delivered directly to their homes while also qualifying for special pricing.

Otherwise, those who wait and don't get through may find it difficult to get their hands on this medical breakthrough. ■

How can you get this pill?

Since no prescription is required to get Fast Acting Trigosamine local readers can have it shipped directly to their homes. Here's how you can get it:

Option #1

Call the National Order Hotline a **1-888-593-2170** and be sure to give the operator **Priority Approval Code T06M4**. This approval code will only be valid for the next **48 hours***. Local readers should begin calling promptly at **7:30 am** today. The special pricing discount will only be available to those calling this hotline within the deadline.

Option #2

Pharmacies across the country are in the process of receiving Fast Acting Trigosamine on a daily basis. **Walmart, CVS/pharmacy, Rite Aid and Walgreens**, have been placing frequent orders and are expected to be among the first retail stores to have their shelves fully stocked.

***48-hour deadline will be strictly enforced — those who miss the deadline will not qualify for the special pricing discount**

Dr. Joseph DiDella PhD currently resides in the research at Paracell[®] LLC, in Cheshire of South. Science Research Department. The 7-year clinical study was completed with 14 participants. On day 5 of the study, those participants taking the Trigosamine experienced a statistically significant increase in the distance they were able to walk, which shows an increase in mobility after just 5 days. Individual results may vary. THESE STATEMENTS HAVE NOT BEEN EVALUATED BY THE FOOD AND DRUG ADMINISTRATION. THIS PRODUCT IS NOT INTENDED TO DIAGNOSE, TREAT, CURE OR PREVENT ANY DISEASE.

BEING FISHY: Professional bass fisherman Hank Clason was having problems with his hands and knees after all the years of getting in and out of boats while with testing in huge bass. "Fishing wasn't much fun anymore, my hands and knees hurt all the time. Then I started using Fast Acting Trigosamine and I began feeling better in a matter of days," said Clason. "I make sure I take Trigosamine everyday and now that the fishing better I plan on spending a lot more time fishing."
