

Knee pain? Is Surgery The Only Option?

Hundreds of Jersey Shore Knee Pain sufferers choose all-natural medical treatment over surgery to relieve arthritis pain-doctors office swarmed for FDA cleared treatment covered by most insurance and Medicare

By Matt Edgar

Knee pain can be crippling. And for serious arthritis sufferers there have been few options besides pain pills and eventually total knee replacement surgery.

That is, until now. For the past year hundreds of knee pain sufferers have flocked to Osteo Relief Institute located in Jersey Shore right here in New Jersey.

That's when their specially trained doctors added viscosupplementation treatments to their already successful and comprehensive knee pain relief program.

Viscosupplementation is unique because even though it is manufactured by a pharmaceutical company, it is NOT considered a drug because it is a natural substance with an incredible story.

Why So Many Want It

You see, when you suffer with arthritis - the lubricating fluid in your knee joint dries up. This means instead of gliding smoothly - your bones start to rub and grind against each other. This causes a little pain in the beginning - but over time the pain steadily gets worse until it is excruciating.

PINPOINT ACCURACY MAKES THE DIFFERENCE

Like "Joint Oil"

Viscosupplementation works so well because it is like "joint oil." It is a natural substance that contains one of the natural building blocks of your knee's lubricating fluid.

When it is injected directly into your knee joint, it is like squirting oil on a rusty door hinge.

Viscosupplementation allows your joints to glide more smoothly eliminating a lot of the rubbing, grinding and pain.

Can Supplements Do The Same Thing?

No. Glucosamine and chondroitin and other

supplements are much different. You can only get this from a doctor and it often helps knee pain sufferers who got limited or no success from glucosamine and chondroitin. Beware of supplements that claim to do what this advanced medical procedure does.

"We have been able to help so many knee pain sufferers - even many who have already tried other injections like Synvisc, Supartz, Oriovisc and even viscosupplementation. We use advanced low-dose video fluoroscopy imaging so we can see right into the joint. This

allows us to put the Hyalgan exactly where it needs to be. Studies show doctors doing joint injections without fluoroscopy miss the joint up to one third of the time." said Dr. Rubbani, head of Arthritis Treatment at Osteo Relief Institute located in Wall, NJ.

"Every case is individual. Some patients get quite a bit of relief right away - others take a little more time. But most have been extremely happy and the results usually last for at least 6 months. Patients who were suffering from years with bad

knee pain are getting their lives back... going for walks again and exercising. It's amazing to see. They tell all their friends - that's why we are swarmed. I can't tell you how many patients have cancelled their total knee replacement surgeries." Added Dr. Rubbani.

How To Get It

If you have knee pain, the doctors would like to invite you for a screening to see if you are a candidate for viscosupplementation treatments.

All you have to do is call 732-587-7899 right now and when the

scheduling specialist answers the phone tell her you would like your "Knee Pain Screening." The doctor can only accept a limited amount of new patients each month for this screening - so if you are interested please call now.

And here's something

really important - viscosupplementation treatments are covered by most insurance and Medicare. To schedule your free screening or if you have any questions call 732-587-7899.
