

"Millions of gold coins in circulation today are counterfeits

—and it's impossible to spot most of them with the naked eye."

—Daniel Rosenthal, Editor, *Silver & Gold Report*

In a Special *SGR* Report *Counterfeit Gold Coins—how to avoid them*, you'll learn...

► **5 warning signs** that you may already have counterfeit gold coins in your portfolio.

► **The two types** of counterfeit gold coins—the gold-plate counterfeits with a brass or lead inner core; and the counterfeits made of real gold. Why the real-gold counterfeits may pose the greater danger to you.

► **Bogus silver:** Why the losses in silver due to counterfeits may be as bad—or worse—than for gold.

► **What to do** if you suspect you may already have been stuck with counterfeits.

The shocking fact is that in 1981 alone, 14 tons of gold were used to make counterfeits. That's enough to manufacture \$300 million of counterfeit US double eagles or \$3 billion of gold-plated brass krugerrands. In 1982, it was worse.

Fortunes will be made in silver & gold. Some of them will be lost in counterfeits.

Silver and gold prices bottomed recently and are back on the rise again. Even if the price rises are modest, people are going to make fortunes—small and large—in the coming boom.

BUT, when they go to sell their coins, they're going to be shocked to find that some of their gold coins are fakes. They'll think each of their coins is worth \$800, \$2,000, or even \$4,000—but will get only \$2. And the same will happen with silver.

The *Silver & Gold Report's* Special Report on Counterfeits tells you what you MUST do to avoid this—and ensure you get all profits earned...

- ✓ **The two most counterfeited gold coins.**
- ✓ **The single riskiest silver investment**—and the two safest.
- ✓ **The 5-second test**—sight, sound, and density—that will enable you to spot all known varieties of counterfeit krugerrands and other major bullion coins.
- ✓ **The 2 safest gold coins to buy.**

"The suggestions...were great"

Doug Casey, Author, *Crisis Investing*

Doug Casey says: "The suggestions in your report on counterfeits were great...Most hard-money commentaries are rehashes of old material. Not that report...Very, very helpful."

Commodities Magazine says: "The *Silver & Gold Report*... has monitored and analyzed silver and gold dealers more closely than perhaps anyone else in the country."

Daily News Digest writes: "Anyone ignoring your articles on how to buy silver and gold is virtually certain to lose out on hundreds—maybe thousands—of dollars of profits every time they buy or sell."

Howard Ruff, says... "If every precious metals investor had read [*SGR's*] reports, not one penny would have been lost in the IGBE or Bullion Reserve scandals."

The Wall Street Journal says: "The first warning [about Bullion Reserve] came in a newsletter published by gold expert Dan Rosenthal."

And **Young's World Money Forecast** writes "Anyone who buys silver or gold without reading your articles about dealers is crazy."

Special Introductory Offer

At a time like this, when the seeds of the next rush into silver and gold are being sown, you'll want to take out full profits—WHILE protecting what you've worked for. *SGR's* gutsy, clear advice helps you do this four ways... (1) **Avoid catastrophic** silver and gold dealers... (2) **Time cycles** in the silver and gold markets... (3) **Buy at rock-bottom prices**; sell for top dollar... and (4) **Avoid counterfeit** silver and gold.
